Status of the Fund

The Hawai‘i Unemployment Compensation Fund balance was $117.5 million at the end of November 2012. During the first eleven months of 2012, $308 million in taxes and $0.9 million in interest were added to the Fund. At the same time, $210 million in benefits were paid out from the Fund. As of November, the fund balance is 0.31 of the adequate level. This amount would finance about four months of unemployment at the worst level experienced during the last ten years.

The unemployment fund was depleted at the end of March 2012 requiring borrowing from the federal loan fund. Borrowing continued during the month of April 2012 with all loans repaid by the end of the month.

Assuming the calendar year 2013 insured unemployment rate averages 2.0%, or about 11,250 claims per week, the fund balance is estimated to be $285 million at the end of 2013. With this fund balance, schedule E would be in effect for 2014.
Economic Factors

The national unadjusted total unemployment rate (TUR) was 7.5% as of October 2012, decreasing from the October 2011 rate of 8.5%. Hawai‘i’s unadjusted total unemployment rate (TUR) was 5.4% in October 2012 as compared to 6.7% in October 2011. Hawai‘i’s total nonagricultural wage and salary job count grew in 2012, averaging 598,500 for the ten months ending October 2012. This is an 8,200 increase from the average of 590,300 for the same period in 2011.

The insured unemployment rate (IUR), a measure of the unemployed covered by Hawai‘i’s unemployment compensation program, is used to project outgo from the Unemployment Compensation Fund. The IUR averaged 2.61% in 2011. It is at 2.03% as of November 2012.

Projections in this report assume declining unemployment levels in Hawai‘i through 2013. Trust fund estimates are based on an insured unemployment rate (IUR) of 2.3% in 2012 and 2.0% in 2013.

2013 Tax Schedule and Taxable Wage Base

Taxes will increase in calendar year 2013 due to the low fund balance at the end of November 2012. Tax schedule G will be in effect for the calendar year 2013. Tax rates will range from 1.8% to 6.4%. The average tax rate is estimated to be 3.2%. The taxable wage base (maximum annual wages taxable per employee) will be $39,600 in 2013.
BACKGROUND INFORMATION

Purpose of Report

This report is produced to meet the requirements of section 383–126.5, Hawai‘i Revised Statutes, which calls for an annual evaluation of the adequacy of the Hawai‘i Unemployment Compensation Fund balance, taking into account conditions in the State and national economic trends. The report is due to the Legislature no later than 20 days prior to the convening of the regular session.

Fund Definition and Requirements

Establishment of Fund in Hawai‘i State Law. The Hawai‘i Employment Security Law (Hawai‘i Revised Statutes, chapter 383) establishes the Unemployment Compensation Fund under the administration of the Department of Labor and Industrial Relations. Unemployment insurance contributions (taxes) are collected from employers and deposited into this fund. Interest earned on the fund balance is also credited to the fund. The fund can be used only to pay unemployment insurance benefits or refunds of overpaid contributions.

Federal Requirements. Both state and federal laws govern the unemployment insurance program. The Federal Unemployment Tax Act (FUTA), which is part of the U.S. Internal Revenue Code, provides for a federal payroll tax—currently 6.0% of the first $7,000 in wages per year per employee. Employers receive a tax credit of 5.4% against the Federal tax (resulting in a net tax rate of 0.6%) if their state’s law meets all the requirements in the federal laws. The federal tax pays for state and federal administration costs, the federal share of extended benefits, and a loan fund for states that deplete their unemployment funds.

The Social Security Act also contains many requirements relating to the unemployment insurance program.

Three important trust fund related federal requirements are as follows.

- All state unemployment compensation funds must be maintained in the U.S. Treasury as part of the federal Unemployment Trust Fund. Each state has an account in the Trust Fund and interest is paid quarterly to the account by the federal government.
- The Trust Fund can be used essentially only for the payment of unemployment benefits.
- Employers receive the full 5.4% federal tax credit only if the state’s system for determining individual employer tax rates meets federal standards. For example, the state’s maximum tax rate must be at least 5.4% and an employer’s tax rate may be reduced from the maximum, but the reduction must be based on that employer’s experience with unemployment (experience rating).

Nonconformity to federal standards can result in:

- denial of all credit against the federal tax (employer’s federal tax would be the full 6.0% on the $7,000 wage base);
- denial of additional credit (employer’s federal tax would be the difference of the full federal tax minus their state taxes paid); and/or
- denial of administration grants to run the state program.

To insure that Hawai‘i employers continue to receive full federal unemployment tax credits, and funding for the state program is not lost, federal standards must be considered in developing laws affecting Hawai‘i’s Unemployment Compensation Fund.

Self-financing of Benefits by Governmental and/or Nonprofit Employers. Sections 383-62 and 62.5, Hawai‘i Revised Statutes provide that State and County governmental employers, nonprofit organizations described in section 501(c)(3) of the Internal Revenue Code and exempt from income tax under section 501(a) of such code, and Indian tribes may elect exemption from paying contributions by requesting self-financing status.
STATUS OF THE UNEMPLOYMENT COMPENSATION FUND

Status of the Fund

(Historical data from 1970: Appendix B, page A-5)

The fund balance was $117.5 million at the end of November 2012 compared to $18.9 million at the end of 2011. During the first eleven months of 2012, $308 million in taxes and $0.9 million in interest were added to the Fund. At the same time, $210 million in benefits were paid out from the Fund.

The unemployment fund was depleted at the end of March 2012 requiring borrowing from the federal loan fund. Borrowing continued during the month of April 2012 with all loans repaid by the end of the month.

Projections through 2013: For this report, the insured unemployment rate is projected to average 2.3% in 2012 and 2.0% in 2013. This would result in a benefit outgo of about $198 million in 2013. Taxes and interest are projected at about $380 million in 2012. On the basis of this forecasted level of unemployment, the fund balance would be about $285 million by the end of 2013 and Tax Schedule E would be in effect for 2014.

Fund Solvency

(Historical data from 1970: Appendix B, page A-6)

The Hawai'i Employment Security Law defines the factors used to measure the adequacy of the Fund and how the tax rate schedule for the coming year is determined based on that adequacy level. Appendix A outlines the method for determining the tax schedule and how each employer's individual tax rate is computed based on the employer's benefit and contribution experience as well as the schedule in effect.

During the 2007 Legislative Session, Act 110 temporarily redefined the adequate reserve fund as the amount of benefits that would be paid out during one year of unemployment at the highest level experienced during the most recent ten years. The prior provisions of the law set the amount at one and one-half years at the highest cost rate. During the 2010 Legislative Session, Act 2 permanently redefined the adequate reserve fund amount to the one-year highest cost rate.
On page A-6, Appendix B, the table entitled *Ratio of Current to Adequate Reserve Fund* shows the data used in tax schedule computations since 1970. For the 2013 tax schedule computation, the adequate amount is $384,041,503. The current reserve fund (actual fund assets as of November 30, 2012) is $117,461,110. At this fund level, Schedule G will be in effect for 2013.

**Tax Rates**
*(Historical data from 1970: Appendix B, page A-7)*

One of eight tax schedules, A through H, is in effect for a calendar year as explained in Appendix A. Schedule A has the lowest tax rates, while schedule H has the highest. The average tax rate attainable from a particular tax schedule depends on the distribution of employers by reserve ratio groups. Employers tend to move to higher reserve ratio groups during periods when contributions exceed benefits. During such times, more employers move into the lower tax rate groups and the average tax rate for a schedule decreases. Conversely, during periods of high unemployment, more employers move to the higher tax rate groups and the average tax rate for each schedule automatically increases.

Under Act 2 (2010 Legislative Session), rather than apply the computed tax schedules, Schedule D was set for rate year 2010 and Schedule F was set for rate year 2011. Without Act 2, the tax schedule would have been F for 2010, and G for 2011. Act 6 (2012 Legislative Session) set the 2012 tax schedule at F; under the normal computations, it would have been Schedule H.

Minimum, maximum, and average tax rates are shown on page A-7; Appendix B. Taxes are estimated to average about 3.2% of taxable wages during calendar year 2013 with Schedule G in effect. From 1985 to 2012 the maximum tax rate on each tax schedule was 5.4%. Under Act 263 (2012 Legislative Session) the maximum tax rates on each schedule were increased as shown on Appendix A.

**Taxable Wage Base**
*(Historical data from 1970: Appendix B, page A-8)*

There is a maximum limit on the amount of taxable annual wages per employee for unemployment insurance tax purposes. The law sets this amount, the *taxable wage base*, at 100% of the statewide average annual wage.

Act 110 (2007 Legislative Session) set the taxable wage base at $13,000 for 2008 through 2010. Act 110 also contained a provision to increase the wage base back to the regular formula if the fund fell below the adequate reserve fund level. Because the fund fell below adequate at the end of November 2009, the 2010 wage base computation should have returned to the 100% formula. However, Act 2 (2010 Legislative Session) reduced the taxable wage base to 90% of the average annual wage for calendar years 2010 and 2011. From 2012, the 100% formula is in effect. The taxable wage base for calendar year 2013 will be $39,600, an $800 increase from the $38,800 wage base in 2012.

Setting the wage base at the average annual wage results in approximately 68% of all wages being subject to unemployment insurance taxes. The $13,000 taxable wage base lowered the percent of total wages taxed to about 36%. The 90% formula resulted in about 66% of wages taxed. The *Total and Taxable Wages* table on page A-8, Appendix B shows the taxable wage bases and the proportions of wages taxed since 1970.

The current tax schedule system was designed to work with the currently defined taxable wage base. When the wage base is lowered, the tax schedules will produce lower levels of income than they were designed to produce.
ECONOMIC FACTORS

General Conditions

Hawai‘i’s and the national unemployment rates have improved during 2012. The national unadjusted total unemployment rate (TUR) was 7.5% for October 2012, decreasing from the October 2011 rate of 8.5%. Hawai‘i’s unadjusted TUR was 5.4% in October 2012 as compared to 6.7% in October 2011. As shown in the chart below, Hawai‘i’s unemployment rate ranged from a high of 7.4% in June 2011, to a low of 5.4% in October 2012. For the month of October 2012, unemployment rates were 5.0% for Honolulu, 5.7% for Maui County, 7.4% for Hawai‘i County, and 6.5% for Kaua‘i County.

Hawai‘i’s total nonagricultural wage and salary job count averaged 598,500 for the ten months ending October 2012. This is an 8,200 increase from the 590,300 average for the same period in 2011. Comparing October 2011 to October 2012, the total job count is up from 595,800 to 608,200. This is a 12,400 or 2.1% increase. Most industrial sectors experienced increases in jobs. The three sectors with the largest job growth were Leisure and Hospitality; Trade, Transportation, and Utilities; and Educational and Health Services.

Outlook: This report assumes slightly improved unemployment levels for Hawai‘i through 2013.
Labor Force Data
(Historical data from 1970: Appendix B, page A-2)

Employment in Hawai’i declined from an annual average 616,450 in calendar year 2011 to 609,750 during the first ten months in 2012. Unemployment also decreased from an average of 44,250 in 2011 to 40,050 for the January through October 2012 period.

Hawai’i’s total unemployment rate (TUR) averaged 6.2% over the first ten months of 2012, improving from the calendar year 2011 average of 6.7%.

The total unemployment rate for the U.S. averaged 8.2% for the first ten months of 2012, decreasing from the calendar year 2011 average of 8.9%.

*Projections for this publication assume the Hawai’i total unemployment rate will average 6.0% in 2012 and 5.5% in 2013.*

Insured Unemployment and Employment Covered by the Unemployment Compensation Fund

(Historical data from 1970: Appendix B, page A-3)

The average monthly number of employees covered by the Fund was 429,306 in 2011, increasing from 423,429 in 2010. Covered employees increased slightly to an average of 433,400 during the first half of 2012.

The insured unemployment rate (IUR) is average weekly unemployment insurance claims as a percent of covered employees. The IUR was 2.03% as of November 2012, compared to the 2011 average of 2.61%. The average weekly number of claims filed under the regular state program was 14,186 in 2011. The number of weekly claims averaged 11,375 as of November 2012.

Projections for the IUR: average of 2.3% for 2012 and 2.0% for 2013.

*Monthly data are for the week containing the 12th of the month and are based on 13-week moving averages. Figures do not include claims under special programs that extend benefits beyond 26 weeks of regular benefits.
Weekly Benefit Amounts and Average Duration  
(Historical data from 1970: Appendix B, page A-4)

The maximum weekly benefit amount payable to claimants will decrease to $534 for the calendar year 2013—$26 less than the $560 maximum in 2012. Under Hawai‘i’s law a new maximum weekly benefit amount is normally computed each year as 70% of the current statewide average weekly wage. Prior to 1992, the computation used 2/3 rather than 70%. Effective for calendar years 2008 through 2010, the computation was made with a 75% multiplier due to Act 110 (2007 Legislative Session). Act 2 (2010 Legislative Session) extended the 75% multiplier through the 2011 computation. The computation returned to 70% for January through March 2012. Act 6 of the 2012 Legislative Session changed the computation back to 75% for claims filed from April through December 2012. From 2013 the formula returns to 70%.

Average weekly benefits received by claimants averaged $412 for the 12-month period ending November 2012 as compared to an average of $405 for calendar year 2011. A weekly benefit amount is computed for each claimant based on prior earnings. Average weekly benefits usually increase over time with increases in earnings. Average benefits increase more rapidly when workers with higher wages experience more unemployment, and may decrease when lower wage claimants represent a larger proportion of the unemployed.

Claimants may receive up to the equivalent of 26 weeks of regular benefits at their computed weekly benefit amount. However many return to work before collecting this entire amount. The average number of weeks of regular benefits received per claimant was 18.0 weeks for the twelve-month period ending November 2012. This is a decrease from the 2011 annual average of 18.4 weeks. These averages do not include benefits paid under special programs that extend benefits beyond the 26 weeks of regular benefits.
EXPERIENCE RATING

Description

Experience rating means that each employer's unemployment insurance tax rate is based on the employer's own benefit, contribution, and wage history. For each employer an account is kept of the amount of benefits paid to former employees and the amount of taxes paid into the Unemployment Compensation Fund. At the end of the year, a reserve ratio is computed for each employer and that reserve ratio determines the employer's tax rate for the coming year. Appendix A describes this procedure.

Charged and Noncharged Benefits
(Historical data from 1970: Appendix B, page A-9)

For experience rating purposes benefits paid to former employees are usually charged to the employers' individual accounts. However, under certain conditions where the employer may be considered not responsible for the claimant's unemployment, the benefits paid to that former employee is not charged to the employer's account. The conditions for noncharging are described in Appendix C. In 2011, 10% of all benefits paid were not charged to an individual employer account. Noncharged benefits are financed by Unemployment Compensation Fund interest income or by employers as a whole by triggering a higher tax schedule due to a lower fund balance.

2011 Employer Data

The following tables show 2011 employment, wage, benefit, and contribution data for employers who contribute to the Unemployment Compensation Fund and for whom a tax rate was computed for calendar year 2012. Information on employers who were covered under the Hawai‘i unemployment insurance program during 2011, but were no longer covered as of January 1, 2012, are not included in these tables. Data are shown by reserve ratio, county, size of firm, and industry groups. The reserve ratio tables show 2011 data by reserve ratios as of the end of 2011. Also shown on those tables are the 2012 tax rates assigned to each reserve ratio group.

Nineteen percent of all employers were in the highest reserve ratio group with ratios of 0.1500 and higher. These 5,600 employers were assigned the minimum 1.2% tax rate for 2012. Fifteen percent of the employers were assigned the maximum 5.4% tax rate, mostly due to delinquent filing of tax reports.

APPENDIX A
Computation of Employer Contribution Rates

An employer's Hawai'i unemployment insurance tax rate is computed once a year based on the employer's reserve ratio and the tax schedule (one of eight possible schedules, A through H) in effect for the year. The tax rates corresponding to each tax schedule and reserve ratio group are shown below in the Contribution Rate Schedules table.

Employers not chargeable with benefits for the 12-month period prior to the rate computation date are ineligible for an experience (reserve ratio) computation and are assigned the tax rate corresponding to a zero reserve ratio; if the ineligible employer has a negative reserve balance, the maximum tax rate on the tax schedule in effect for the calendar year is assigned.

Computation of Employer Reserve Ratio:

\[
\text{Reserve Ratio} = \frac{\text{all contributions paid by the employer minus all benefits charged to the employer}}{1/3 \times \text{sum of the employer's taxable payrolls for the last 3 consecutive calendar years}}.
\]

Determination of Tax Schedule:

(a) Compute Adequate Reserve:

\[
\text{Adequate Reserve} = \text{*highest benefit cost rate occurring during the last 10 years, times total wages for last completed fiscal year ending June 30.}
\]

\[
\text{Benefit cost rate} = \frac{\text{total benefits paid during a 12 consecutive month period}}{\text{total wages for the last 4 completed calendar quarters ending at least 5 months before the end of the 12 consecutive month period}}.
\]

(b) Compute ratio of Current Reserve to Adequate Reserve:

\[
\text{Ratio} = \frac{\text{Current Reserve (Unemployment Compensation Fund balance as of November 30)}}{\text{Adequate Reserve}}.
\]

(b) Determine Tax Schedule based on ratio of current to adequate reserve as shown below.

*1.5 times multiplier was in effect for rate years 1970 to 1978 and 1992 to 2007.

</tbody>
</table>

**Rate Year:** year during which rate schedule or Fund Solvency Rate is in effect.

- **High Cost Rate:** highest benefit cost rate (benefits as a percent of total wages) in the last ten years.
- **Total Wages:** for last four calendar quarters ending June 30 of calendar year prior to rate year.
- **Adequate Reserve Fund:** 1970 to 1978 and 1992 to 2007 adequate reserve equals 1.5 times high cost rate times total wages. 1979 to 1991 and from 2008, adequate reserve equals high cost rate times total wages.
- **Current Reserve Fund:** UC Fund assets on November 30 of calendar year immediately preceding rate year.
- **Rate Schedule in Effect:** From July 1, 1974 through March 31, 1975 all employers' tax rates were increased by 0.5%, up to a maximum of 3.0%; from April 1975 through the end of 1976, all employers paid 3.0% tax rate; for 1977 and 1978 all employers paid 3.5% tax rate. **2002:** schedule C remained in effect due to special legislation. **2010 and 2011:** Act 2 (2010 Legislative Session) set tax schedules at D and F; 2012: Act 6 (2012 legislative Session) set schedule at F.

Source: ETA-204, Experience Rating Report
Includes regular program benefits only; does not include extended benefits
APPENDIX C
Benefits Not Charged to Employer Accounts

The following types of unemployment insurance benefits are not charged to individual employer's unemployment insurance accounts:

a. Benefits paid to a claimant based on wages from an employer from whom the claimant voluntarily quit work without good cause;

b. Benefits paid to a claimant based on wages from an employer from whom the claimant was discharged for misconduct connected with work;

c. Benefits paid to a claimant based on wages from an employer from whom the claimant left work voluntarily for a good cause that was not attributable to the employer;

d. Benefits paid to an individual who during that individual's base period earned wages for part-time employment with an employer, are not charged to that employer if the employer continues to employ the individual to the same extent while the individual is receiving benefits as during the individual's base period;

e. Benefits paid to an individual for the period that individual is enrolled in and is in regular attendance at an approved training course;

f. One-half of Extended Benefits (the other half of EB is financed with federal unemployment tax funds);

g. Benefits paid to an individual who qualifies to receive benefits by meeting the minimum earnings and employment requirements only by combining the individual's employment and wages earned in two or more states;

h. Benefits overpaid to a claimant as a result of ineligibility or disqualification, unless the overpayment resulted from the employer's failure to furnish information as required;

i. Benefits paid to an individual based on wages from an employer from whom the individual is separated as a direct result of a major disaster.

---

1 Benefits described in a, b, and c were chargeable from July 15, 1976 through October 4, 1986.
2 EB was chargeable from January 1, 1985 through October 4, 1986.
3 Benefits described in g and h became nonchargeable from July 15, 1976.
4 Effective from September 13, 1992.
APPENDIX D
The Hawai‘i Unemployment Compensation Fund
and Economic Conditions: 1970 to the Present

1970  The 1970s began with a low IUR (Insured Unemployment Rate) of slightly above 2% and high fund reserves in excess of $40 million.

1971  Unemployment increased throughout 1971 in the aftermath of the Mainland recession, and due partly to a lengthy dock strike in the second half of the year. The Extended Benefits program was initiated allowing an additional 13 weeks of unemployment insurance benefits to be paid to claimants who exhaust their 26 weeks of regular benefits during periods of high unemployment. Hawai‘i paid extended benefits from October 1971 through December 1972. Increasing unemployment and additional benefits paid out under the Extended Benefits program caused benefit outgo to increase and the fund balance to decline.

1972  The fund continued to decline as additional dock strikes and continuing Extended Benefits payments caused benefit outgo to remain high.

1973  Unemployment decreased slightly causing the fund balance to remain relatively level.

1974  The IUR began to climb again as Mainland recessionary conditions started affecting Hawai‘i.

1975  Hawai‘i began a new Extended Benefits period beginning in February 1975 as unemployment continued to increase. This EB period continued until March 1978 (except for a short break in the program during August 1977).

1976  The IUR reached a peak of 7% in the first half of 1976. During the 1974 through 1976 period, the fund balance was drastically reduced by the unprecedented high level of unemployment and corresponding high benefit outgos. The fund was depleted in 1976. Benefits continued to be paid during the year through the use of $22.5 million in federal loans to the fund.

1977  The economy began to improve slightly, although construction strikes caused unemployment to temporarily increase at the end of 1977 and early 1978. In order to rejuvenate the fund, tax rates, which had been gradually increasing during the 1970s, were set at a uniform rate of 3.5% for 1977.

1978  The flat 3.5% tax rate continued to be in effect. As the economy improved, the IUR steadily declined until it leveled off at about 3% during the second half of the year. With the increased income and declining outgo, the fund balance was brought out of its negative levels and the federal loan was repaid late in 1978.

1979  Varied tax rates for employers (experience rating) was reinstituted; this caused fund income to decline slightly from the high 1978 level. Benefits remained relatively low, resulting in a further increase in the fund balance to $78 million by the end of 1979.

1980  Employer tax rates were again decreased based on the healthy fund reserves. Although Hawai‘i’s unemployment remained low, an Extended Benefits period was triggered on by high national unemployment. This EB period was from July 1980 to January 1981. Fund income exceeded outgo and reserves reached $100.6 million by the end of 1980.

1981-1984  Unemployment was very stable with the IUR fluctuating only between 2.5% and 3.5%, weathering airline, construction, and other strikes occurring during this time. The fund balance was kept at about the adequate reserve level throughout the period.

1985  Tax schedules were adjusted to include a maximum tax rate of 5.4% in order to allow employers to continue to receive full tax credits under the Federal Unemployment Tax Act (FUTA).

1986-1987  The tourism and construction industries were in a boom period resulting in declining unemployment and a growing fund balance.

1988  The high fund balance resulted in the triggering of a negative Fund Solvency Rate for the first time. Also, a one-year special law provision cut the Taxable Wage Base to 50% of the statewide average annual wage.

1989  Unemployment continued to decline with the IUR reaching an all time low of 0.96% in December 1989. The fund continued to be more than twice the adequate reserve level allowing the negative 0.5% Fund Solvency Rate to remain in effect.

1990  Despite Mainland recessionary conditions, Hawai‘i tourism and construction continued to do well through 1990. Although a hotel strike during March caused a temporary rise in unemployment, the average IUR for the year remained level with 1989.
1991  The Persian Gulf War triggered a slowdown in March as tourist traffic declined dramatically and unemployment jumped. Mainland recessionary conditions began affecting Hawai‘i’s economy as unemployment remained high through the year especially in the construction and tourism related industries. A one-year special provision cut the taxable wage base to $7,000.

1992  A new tax schedule system was implemented and the lowest tax schedule (A) was in effect for 1992. Hurricane Iniki hit the islands in September 1992 resulting in major damage and high unemployment on Kaua‘i. Mainland and Japanese recessionary conditions continued to weaken the tourist and construction sectors. The end of year fund balance declined from the previous year for the first time since 1982. Emergency Unemployment Compensation (EUC) benefits were paid to claimants from November 1991 through April 1994. EUC benefits, paid to claimants who exhausted their regular state benefits, were 100% federally funded.

1993-1994  Tax schedule B was in effect for 1993 and 1994, keeping the average unemployment tax rate at a low 1%. At the same time, the tourism and construction sectors remained sluggish causing large benefit payouts from the fund.

1999-2000  The economy was on the rise with insured unemployment dropping below 2% and the fund balance reaching $300 million levels, triggering tax schedule C for 2001.

2001-2002  In the aftermath of terrorist attacks on the World Trade Center and the Pentagon on September 11, 2001, the number of unemployed increased and the fund balance began to drop. Special legislation provided Hawai‘i claimants exhausting regular benefits between September 11, 2001 and June 30, 2002 with 13 weeks of additional benefits and kept tax schedule C in effect for calendar year 2002. A special federally funded program, Temporary Extended Unemployment Compensation (TEUC) also provided an additional 13 weeks of benefits to claimants, effective from March 10 to December 31, 2002.

2003-2004  The federal TEUC program was extended to December 31, 2003 with a transition period for the continuation of payments to individuals, who had balances as of the end of December, to March 31, 2004. Effective from April 20, 2003 through December 28, 2003, displaced airline and related workers who exhausted their 26 weeks of regular benefits received up to 39 weeks of additional federally funded TEUC-A benefits. Throughout 2004, Hawai‘i’s unemployment dropped significantly resulting in a growing trust fund.

2005-2006  Tourism, construction and real estate contributed to a very healthy economy where the insured unemployment rate dropped to 1.0% by the last quarter of 2005. The fund balance grew to more than $500 million by November 2006 triggering a decrease in tax rates to Tax Schedule B for calendar year 2007.

2007  The 2007 Legislature enacted Act 110 which: increased the partial earnings disregard amount from $50 to $150; increased the maximum weekly benefit amount formula from 70% to 75% of statewide average annual wages for calendar years 2008 through 2010; set the taxable wage base at $13,000 for calendar years 2008 through 2010; and changed the adequate reserve formula to remove the one and one-half times multiplier for the calendar years 2008 through 2010 tax schedule computations.

2008-2009  Airline closures in April 2008, the departure of major cruise ships, closures of pineapple and sugar operations, and finally major problems with the national financial sector resulted in a downturn in both the national and Hawai‘i economies. The tourism and construction industries were especially hard hit. Recessionary conditions on the Mainland and in Hawai‘i resulted in the IUR nearly doubling from an average 1.78% in 2008 to 3.36% in 2009, and the fund balance falling from $552 million at the end of 2007 to $134 million as of the end of 2009.

A 100% federally financed Emergency Unemployment Compensation (EUC08) program was enacted to provide claimants who exhaust their regular 26 weeks of benefits with an additional 13 weeks of benefits effective from July 6, 2008. From November 23, 2008 an additional seven weeks were added, for a total of 20 weeks, of EUC08 benefits. Beginning with the week ending May 9, 2009, claimants who exhaust their first 20 weeks of EUC08 benefits (Tier 1) before December 31, 2009 could receive an additional 13 weeks of Tier 2 EUC08 benefits. Effective with the week ending November 14, 2009, claimants are eligible for one additional week of Tier 2, and 13 weeks of Tier 3 EUC08 benefits. This brought the total to 47 weeks of federally funded EUC08 benefits for Hawai‘i claimants.
2010-2011

The EUC08 program was extended twice in 2010 and is scheduled to end January 3, 2012. Claimants who exhaust their regular or EUC08 tier benefits will not be able to begin a new tier after that date. Claimants may continue to receive benefits under their current tier until June 9, 2012.

Act 2 was enacted during the 2010 Legislative Session resulting in: extending the 75% formula for computing the maximum weekly benefit amount (MWBA) for 2010 and 2011; reducing the taxable wage base formula to 90% of the statewide average annual wage for 2010 and 2011; permanently reducing the adequate reserve fund definition by eliminating the 1.5 times multiplier; and setting the tax schedules at D for 2010 and F for 2011, rather than applying the computed tax schedules which would have been F and G respectively.

Economic conditions slowly improved throughout this period with the IUR declining from 3.4% in January 2010 to 2.4% in November 2011. However, benefit outgo continued to exceed contributions through the first half of 2011. The unemployment fund was depleted in December 2010 requiring Hawai‘i to borrow federal Title IX loan funds to continue paying benefits. From December 2010 through August 2011, $163 million in federal loans were received. All loans were repaid by August 2011.

2012

The EUC08 program was extended from June 2012 to end on January 2, 2013.

Effective January 2012 the MWBA formula returned to the 70% computation. However, it was only in effect from January through March as Act 6 (2012 Legislative Session) changed the formula back to 75% from April to the end of 2012. Act 6 also changed the 2012 tax schedule to F. The highest schedule, H, should have been in effect for 2012 as the fund balance had dropped to less than $38 million at the end of November 2012.

The unemployment fund was depleted at the end of March 2012 requiring borrowing from the federal loan fund. Borrowing continued during the month of April 2012 with all loans repaid by the end of the month. Improving economic conditions during the second half of 2012 resulted in the fund balance increasing to over $100 million by the end of November.
