Regular Employee:

One who works 20 or more hours a week and earns at least 86.67 times the prevailing minimum wage.

Minimum Monthly Wage:

86.67 x State Prevailing Minimum Wage \$1,214.00

- ¹ The WC maximum weekly wage base is determined by dividing the WC maximum weekly benefit amount by 0.6667.
- ² If an employee's average weekly wage is less than \$26, the weekly benefit amount is equal to the average weekly wage but not more than \$14. If it is \$26 or more, the weekly benefit amount is 58% of the average weekly wage rounded to the next higher dollar up to a maximum of \$837.00. Wages in excess of \$1,441.72 need not be included in the computation of the weekly benefit amount.
- ³ An employer may withhold TDI contributions of one-half the premium cost but not more than .5% of the employee's weekly wage, with the maximum not to exceed \$7.21. An employer may not deduct premium cost from an employee who does not meet the eligibility requirements of Section 392-25, HRS.
- ⁴ An employer may withhold one-half the PHC premium cost but not to exceed 1.5% of an employee's wages. If the employee's allowable share is less than one-half of the premium, the employer is liable for the entire remaining portion.
