

APPLICATION FOR FEDERAL ASSISTANCE SF-424

Version 02

1. Type of Submission:

- ☐ Preapplication
☒ Application
☐ Changed/Corrected Application

2. Type of Application:

- ☐ New
☒ Continuation
☐ Revision

If Revision, select appropriate letter(s)

Other (specify):

3. Date Received

4. Applicant Identifier:

5a. Fed Entity Identifier:

5b. Federal Award Identifier:

DE-EE0007915

State Use Only:

6. Date Received by State:

7. State Application Identifier:

8. APPLICANT INFORMATION:

a. Legal Name: Office of Community Services, Dept of Labor & Industrial Relations, State of Hawaii

b. Employer/Taxpayer Identification Number (EIN/TIN):
990266120

c. Organizational DUNS:
949978845

d. Address:

Street 1: 830 Punchbowl Street, Rm. 420
Street 2:
City: Honolulu
County: HONOLULU County
State: HI
Province:
Country: U.S.A.
Zip / Postal Code: 968135095

e. Organizational Unit:

Department Name:
Department of Labor and Industrial Relations

Division Name:
Office of Community Services

f. Name and contact information of person to be contacted on matters involving this application:

Prefix: Ms First Name: Courtney
Middle Name:
Last Name: Ho
Suffix:

Title: Program and Evaluation Administrator

Organizational Affiliation: Hawaii Office of Community Services

Telephone Number: 8085868679

Fax Number: 8085868685

Email: courtney.n.ho@hawaii.gov

APPLICATION FOR FEDERAL ASSISTANCE SF-424

Version 02

9. Type of Applicant:

A State Government

10. Name of Federal Agency:

U. S. Department of Energy

11. Catalog of Federal Domestic Assistance Number:

81.042

CFDA Title:

Weatherization Assistance Program

12. Funding Opportunity Number:

DE-WAP-0002021

Title:

2021 Weatherization Assistance Program

13. Competition Identification Number:

Title:

14. Areas Affected by Project (Cities, Counties, States, etc.):

Statewide (City and County of Honolulu, Hawaii County, Maui County, Kauai County)

15. Descriptive Title of Applicant's Project:

The Weatherization Assistance Program (WAP) enables low-income families to permanently reduce their energy bills by making their homes more energy efficient. The U.S. Department of Energy (DOE) provides funding to Department of Labor and Industrial Relations- Office of Community Services (DLIR-OCS) and other States and territories to manage the program and provide weatherization assistance to eligible clients.

APPLICATION FOR FEDERAL ASSISTANCE SF-424

Version 02

16. Congressional District Of:

a. Applicant: Hawaii Congressional District 01

b. Program/Project: HI-Statewide

Attach an additional list of Program/Project Congressional Districts if needed:

17. Proposed Project:

a. Start Date: 07/01/2021

b. End Date: 06/30/2022

18. Estimated Funding (\$):

a. Federal	280,638.00
b. Applicant	0.00
c. State	0.00
d. Local	0.00
e. Other	0.00
f. Program Income	0.00
g. TOTAL	280,638.00

19. Is Application subject to Review By State Under Executive Order 12372 Process?:

- ☐ a. This application was made available to the State under the Executive Order 12372 Process for review
- ☒ b. Program is subject to E.O. 12372 but has not been selected by the State for review.
- ☐ c. Program is not covered by E.O. 12372

20. Is the applicant Delinquent On Any Federal Debt? (If "Yes", provide explanation)

No

21. By signing this application, I certify (1) to the statements contained in the list of certifications and (2) that the statements herein are true, complete and accurate to the best of my knowledge. I also provide the required assurances** and agree to**

☐ I AGREE

** The list of certifications and assurances, or an internet site where you may obtain this list, is contained in the announcement or agency

U.S. DEPARTMENT OF ENERGY

BUDGET JUSTIFICATION FOR FORMULA GRANTS

Applicant: Office of Community Services, Dept of Labor & Industrial Relations,
State of Hawaii

Budget period: 07/01/2021 - 06/30/2022

Award number: EE0007915

1. **PERSONNEL** - Prime Applicant only (all other participant costs are listed in 6 below and form SF-242A, Section B.

Line 6.f. Contracts and Sub-Grants).

Positions to be supported under the proposed award and brief description of the duties of professionals:

Position	Description of Duties of Professionals
Program Specialist	Project Administration Program Support (The maximum allowed administration cost on the PY 2021 grant is \$21,048.00. OCS Program Specialist earns a salary of \$48,000.00. Since 43.85% of \$48,000 is more than \$100.00 over the maximum administration cost of \$21,048.00, the OCS Program Specialist input the amount that would allow PAGE to submit.)

Direct Personnel Compensation:

Position	Salary/Rate	Time	Direct Pay
Program Specialist	\$48,000.00	43.8500 % FT	\$21,048.00
		Direct Pay Total	\$21,048.00

2. **FRINGE BENEFITS**

- a. Are the fringe cost rates approved by a Federal Agency? If so, identify the agency and date of latest rate agreement or audit below, and attach a copy of the rate agreement to the application.

Administrative allotment is exhausted by limit placed on salary amount allowed under WAP.

- b. If a. above does not apply, please use this box (or an attachment) to further explain how your total fringe benefits costs were calculated. Your calculations should identify all rates used, along with the base they were applied to (and how the base was derived), and a total for each (along with grand total). If there is an established computation methodology approved for state-wide use, please provide a copy. Also, please fill out the table below with the Fringe Benefits Calculations.

3. **TRAVEL**

- a. Please provide the purpose of travel, such as professional conference(s), DOE sponsored meeting(s), project management meeting, etc. If there is any foreign travel, please identify.

Purpose of Trip	Number of Trips	Cost Per Trip	Total
DLIR-OCS is budgeting for airfare, rental car, parking, and per diem to monitor the three providers that are not located on the island of Oahu, DLIR-OCS's home base.	3	\$400.00	\$1,200.00
DOE issued WAP Memorandum 076, which authorized and encouraged the use of T&TA funds to attend the National Association for State Community Service Programs (NASCSP). Since NASCSP's 2021 Annual Training Conference will be held virtually, DLIR-OCS is budgeting for airfare, transportation, hotel, and per diem to attend NASCSP's winter conference in February/March 2022 .	1	\$2,400.00	\$2,400.00

Travel Total	\$3,600.00
--------------	------------

- b. Please provide the basis for estimating the costs, such as past trips, current quotations, Federal Travel Regulations, etc. All listed travel must be necessary for the performance of the award objectives.

DLIR-OCS is estimating \$2,400 for travel to conferences. The estimated costs are based on a combination of previous training and travel costs in prior years and on current airline, lodging and rental car quotes. DLIR-OCS is estimating \$1,200 for travel to the neighbor islands to conduct monitoring activities. The estimated costs are based on a combination of previous monitoring and travel expenses and on current airline and car rental quotes.

4. EQUIPMENT - Equipment is generally defined as an item with an acquisition cost greater than \$5,000 and a useful life expectancy of more than one year.

- a. List all proposed equipment below and briefly justify its need as it applies to the objectives of the award.

Equipment	Unit Cost	Number	Total Cost	Justification of Need
-----------	-----------	--------	------------	-----------------------

- b. Please provide a basis of cost such as vendor quotes, catalog prices, prior invoices, etc. and justify need. If the Equipment is being proposed as Cost Share and was previously acquired, please provide the source and value of its contribution to the project and logical support for the estimated value shown. If it is new equipment which will retain a useful life upon completion of the project, provide logical support for the estimated value shown. Also, please indicate whether the Equipment is being used for other projects or is 100% dedicated to the DOE project.

5. SUPPLIES - Supplies are generally defined as an item with an acquisition cost of \$5,000 or less and a useful life expectancy of less than one year. Supplies are generally consumed during the project performance.

- a. List all proposed supplies below, the estimated cost, and briefly justify the need for the supplies as they apply to the objectives of the award. Note that all direct costs, including Supply items, may not be duplicative of supply costs included in the indirect pool that is the basis of the indirect rate applied for this project.

General Category	Cost	Justification of Need
------------------	------	-----------------------

- b. Please provide a basis of cost for each item listed above and justify need. Examples include vendor quotes, prior purchases of similar or like items, published price list, etc.

6. CONTRACTS AND SUBGRANTS - Provide the following information for New proposed subrecipients and subcontractors. For ongoing subcontractors and subrecipients, this information does not have to be restated here, if it is provided elsewhere in the application; under Name of Proposed Sub, indicate purpose of work and where additional information can be found (i.e weatherization subgrants, Annual File section IV.1).

Name of Proposed Sub	Total Cost	Basis of Cost*
----------------------	------------	----------------

Subgrantee Program Operations	\$519,214.00	Total amount that will be contracted to subgrantees for their program operations budget category and to use for weatherizing homes. Allocation for subgrantees were calculated based on carryover estimated as of cash requests submitted by March 3, 2021, and are subject to change. On the basis of this allocation, we expect that Honolulu Community Action Program, Inc. (HCAP) will receive \$309,399, Hawaii County Economic Opportunity Council (HCEOC) will receive \$108,620, Kauai Economic Opportunity, Inc. (KEO) will receive \$27,726, and Maui Economic Opportunity, Inc. (MEO) will receive \$73,469 for Program Operations.
Subgrantee Administrative	\$32,975.00	New award is less than \$350,000 so subgrantees can be allocated an additional 5% of their subawards for administration. Allocation for subgrantees were calculated based on carryover estimated as of cash requests submitted by March 3, 2021, and are subject to change. On the basis of this allocation, we expect that HCAP will receive \$19,650, HCEOC will receive \$6,898, KEO will receive \$1,761, and MEO will receive \$4,666 for Administrative costs.
Subgrantee T&TA	\$29,900.00	DLIR-OCS is budgeting for subgrantees to provide Training and Technical Assistance (T&TA) for staff (i.e., attend training conferences, register for online training courses, materials for training pamphlets). Allocation of subgrantees T&TA were calculated based on carryover estimated as of cash requests submitted by March 3, 2021, and are subject to change. On the basis of this allocation, we expect that HCAP will receive \$8,600, and HCEOC, KEO, and MEO will each receive \$7,100 for T&TA costs.
Contracts and Subgrants Total	\$582,089.00	

*For example, Competitive, Historical, Quote, Catalog

7. OTHER DIRECT COSTS - Other direct costs are direct cost items required for the project which do not fit clearly into other categories. These direct costs may not be duplicative of costs included in the indirect pool that is the basis of the indirect rate applied for this project. Examples are: conference fees, subscription costs, printing costs, etc.

a. Please provide a General Description, Cost and Justification of Need.

General Description	Cost	Justification of Need
---------------------	------	-----------------------

b. Please provide a basis of cost for each item listed above. Examples include vendor quotes, prior purchases of similar or like items, published price list, etc.

8. INDIRECT COSTS

a. Are the indirect cost rates approved by a Federal agency? If so, identify the agency and date of latest rate agreement or audit and provide a copy of the rate agreement.

- b. If the above does not apply, indicate the basis for computation of rates, including the types of benefits to be provided, the rate(s) used, and the cost base for each rate. You may provide the information below or provide the calculations separately.

The name and phone number of the individual responsible for negotiating the State's indirect cost rates.

IV.6 State Plan Hearings (Note: attach notes and transcripts to the SF-424)

Date Held Newspapers that publicized the hearings and the dates the notice ran

02/23/2021 On February 23, 2021 DLIR-OCS held a virtual conference call with all four subgrantees. At least one WAP staff or subgrantee representative was present on the conference call to discuss any questions or comments on the WAP PY21 State Plan.

03/04/2021 On March 4, 2021, DLIR-OCS held a PAC meeting to discuss changes to WAP PY21 State Plan. Since Dean Masai retired, DLIR-OCS invited Gail Suzuki to join, who works at Hawaii State Energy Office.

03/11/2021 By March 11, 2021, DLIR-OCS plans to post a notice for a virtual public hearing on the Hawaii OCS website, and hold the public hearing 10 days later.

American Customer Satisfaction Index (ACSI) Action Plan

Based on the results of the 2019 ACSI and responses from Subgrantees, the State of Hawaii's Office of Community Services' (OCS) action plan for PY 2021 is to:

- Continue improving communications with Subgrantees on developing the State Plan to increase transparency, and strengthen the relationship between the State office and Community Action Agencies;
- Develop and host a virtual training for Subgrantees, specific to the State of Hawaii's WAP program to gain more knowledge on technical guidances; and
- Coordinate grant monitoring with Subgrantees by scheduling a virtual monitoring interview, informing Subgrantees of documents that will be reviewed via desk monitoring prior to the virtual monitoring interview, and sending monitoring reports containing relevant feedback and best practices within thirty (30) days after the monitoring visit.

Hawaii's WAP Policies and Procedures

The State of Hawaii's OCS is updating the WAP Policies and Procedures, which will be finalized and sent to DOE for review and approval.

U.S. Department of Energy
WEATHERIZATION ASSISTANCE PROGRAM (WAP)
STATE PLAN/MASTER FILE WORKSHEET

(Grant Number: EE0007915, State: HI, Program Year: 2021)

This worksheet should be completed as specified in Section III of the Weatherization Assistance Program Application Package.

V.1 Eligibility

V.1.1 Approach to Determining Client Eligibility

Provide a description of the definition of income used to determine eligibility

The program serves households that meet the client eligibility criteria in 10 CFR §440. In general, eligible households are at or below 200 percent of the Federal Poverty Guidelines for Hawaii, as established by the U.S. Department of Health and Human Services, or contain a household member who has received cash assistance payments under Title IV or XVI of the Social Security Act during the 12-month period preceding the determination of eligibility.

DLIR-OCS is working with Hawaii Public Housing Authority (HPHA) and the four subgrantees on meeting eligibility requirements. DLIR-OCS is currently working on receiving approval from Department of Housing and Urban Development (HUD) and U.S. Department of Energy (DOE) to weatherize HPHA multifamily buildings.

Describe what household eligibility basis will be used in the Program

The primary goal is to provide weatherization services and reduce energy costs for low-income households in accordance with 10 CFR §440.3, §440.22 and §440.16(b). Priority shall be given to households with elderly persons (over the age of 60), persons with disabilities, families with children (up to age 19), high residential energy users, and households with a high energy burden.

Describe the process for ensuring qualified aliens are eligible for weatherization benefits

DLIR-OCS is fully compliant with the requirements of the Qualified Alien Status and Eligibility provisions of the Personal Responsibility and Work Opportunity Reconciliation Act of 1996, and DLIR-OCS adheres to the guidance provided by Weatherization Program Notice (WPN) 12-1, part 5.1, effective January 31, 2012. Grantees are directed and encouraged to review guidance provided by Health and Human Services (HHS) under Low-Income Home Energy Assistance Program (LIHEAP). This guidance can be found by going to <https://aspe.hhs.gov/basic-report/summary-immigrant-eligibility-restrictions-under-current-law#sec1>. HHS Information Memorandum LIHEAP-IM-25 dated August 28, 1997, states that all qualified aliens, regardless of when they entered the United States, continue to be eligible to receive assistance and services under LIHEAP if they meet other program requirements. To eliminate any possible contradiction of eligibility for weatherization services at the state and local level for qualified aliens, the definition adopted by HHS will also apply to the DOE WAP. HHS issued Information Memorandum LIHEAP-IM-98-25 dated August 6, 1998, outlining procedures for LIHEAP and weatherization subgrantees serving non-qualified aliens to implement new status verification requirements. To ensure continuity between LIHEAP and WAP for the many subgrantees operating both programs, the DOE WAP will follow the interpretation as adopted by HHS.

V.1.2 Approach to Determining Building Eligibility

Procedures to determine that units weatherized have eligibility documentation

Subgrantees have intake, client selection procedures, and unit energy audit procedures to determine the eligibility of the clients and the dwelling units. First, staff follow procedures on how to administer an intake form, which gathers information on family data, annual income, and client needs. An assessment of the dwelling unit will be conducted to ascertain whether the unit meets the criteria for WAP weatherization services. Subgrantees will ascertain whether the energy consumption levels at the dwelling unit appear to be excessive and amenable to remediation by installation of standard Hawaii WAP remediation installations, such as solar hot water heaters and/or energy-efficient refrigerators. Then a Program Coordinator will screen the intake form and determine household eligibility within program guidelines. After a client's eligibility has been certified, the client will remain eligible for weatherization assistance for twelve months from date of application. If weatherization work has not started before the twelve months are up, the household may reapply using only a declaration of income statement. However, applicants who are on the waiting list are subject to the WPN 21-3 requirement that eligibility documentation be updated at least annually.

Eligible buildings must comply with 10 CFR §440.22, such that not less than 66 percent of the dwelling units in the building are income eligible or will become eligible within 180 days. No dwelling unit may be weatherized without verification of income eligibility from either HPHA, the property owner, or the household.

U.S. Department of Energy
WEATHERIZATION ASSISTANCE PROGRAM (WAP)
STATE PLAN/MASTER FILE WORKSHEET

(Grant Number: EE0007915, State: HI, Program Year: 2021)

Describe Reweatherization compliance

According to WAP Memo 075, Section 1011(h) of the Energy Act of 2020, will amend 42 US Code §6865(c)(2) and remove the reweatherization date, September 30, 1994, and create a "rolling" option.

"Dwelling units weatherized (including dwelling units partially weatherized) under this part, or under other Federal programs (in this paragraph referred to as 'previous weatherization'), may not receive further financial assistance for weatherization under this part until the date that is 15 years after the date such previous weatherization from receiving assistance and services (including the provision of information and education to assist with energy management and evaluation of the effectiveness of installed weatherization materials other than weatherization under this part or under other Federal programs, or from receiving non-Federal assistance for weatherization."

For reweatherization, the client's file must be closed for at least 15 years after the date the final inspection was completed and no further follow up was required. Subgrantees must document that the applicant meets eligibility criteria for DOE WAP services and conduct a new home energy audit. Re-weatherization protocol shall match that of a new client with the exception that the dwelling unit was weatherized at least 15 years ago, from the date that the last final inspection was completed.

Subgrantees retain new records of all weatherized dwellings for a minimum of three years from the day the grant is closed and keep a list of homes that have been weatherized. The retained records include the date of weatherization and a description of DOE funds and other funds used for weatherization of a particular dwelling.

If a subgrantee wishes to serve homes located in disaster area, they shall abide by DOE guidance, WPN 12-7, which addresses Disaster Planning and Relief. Subgrantees follow the appropriate procedures when initiating reweatherization measures of these dwelling units.

Describe what structures are eligible for weatherization

Eligible dwelling units per 10 CFR §440 includes rental or owner-occupied single-family dwellings, manufactured homes, multi-family buildings up to 24 units, and shelters. To receive weatherization services, a manufactured home must be a permanent, stationary, full-time residential dwelling. Buildings with 25 or more units may be weatherized with prior approval from the state. Non-stationary campers and trailers are not allowed to receive weatherization services.

Property fifty years old or older must be reviewed for possible historic status or features and shall be weatherized only in such a way as complies with the State Historic Preservation Officer (SHPO) Programmatic Agreement.

Describe how Rental Units/Multifamily Buildings will be addressed

Subgrantees may weatherize any rental unit including dwelling units in a small multi-family building using Hawaii's supplemental priority list, which was approved by DOE on March 3, 2020. Small multi-family buildings are defined as having 5 to 24 dwelling units in the building. Prior to weatherization of any rental unit, written permission of the building owner or their agent is required. Subgrantees will also have the property owner sign a Landlord Cooperation Agreement, attached as Other_Master_Landlord Agreement, to help identify the direct benefits of the weatherization work and ensure the benefits accrue primarily to the low-income client, in accordance with 10 CFR §440.22(b)(3)(i). The landlord tenant agreement prevents the landlord from evicting the tenant or from increasing unless the eviction or rent increase is demonstrably related to matters other than the weatherization work performed, and otherwise requiring landlord cooperation in supporting the goals of these WAP weatherization installations, in accordance with 10 CFR §440.22(b)(3). Subgrantees may use their own versions of a landlord tenant agreement provided that it complies with all applicable policies and procedures regarding rentals as described in Hawaii's WAP Policies and Procedures Manual. DLIR-OCS will update WAP Policies and Procedures, and the finalized version will be sent to DOE PO and Technical PO, which will then be distributed to Subgrantees.

In instances where a tenant does not pay for utilities directly, subgrantees must ensure the weatherization benefits accrue to the low-income tenants. The subgrantee needs to demonstrate in sufficient detail how the benefits of weatherization work will accrue to primarily the low-income tenants of the eligible multi-family building. A combination of at least three of the following benefits which include, but are not limited to:

- Longer term preservation of the property as affordable housing;
- Continuation of protection against rent increases beyond that required under the WAP regulations (10 CFR §440.22(b)(3)(ii));
- Investment of the energy savings in facilities or services that offer measurable direct benefits to tenants;
- Investment of the energy savings from the weatherization work in specific health and safety improvements with measurable benefits to tenants;
- Improvements to ventilation and to heat and hot water distribution to improve the comfort of residents;

U.S. Department of Energy
WEATHERIZATION ASSISTANCE PROGRAM (WAP)
STATE PLAN/MASTER FILE WORKSHEET

(Grant Number: EE0007915, State: HI, Program Year: 2021)

- Establishment of a shared savings program; and
- Generic assertions such as "tenant services will be improved" or "weatherization will improve health and safety" are not sufficient to demonstrate that the accrual of benefits requirement is met.

To weatherize multi-family buildings with more than 24 dwelling units, subgrantees will work with the property owner to document that not less than 66 percent of the dwelling units in the building are income eligible or will become income eligible dwelling units within 180 days under a Federal, State, or local government program, in accordance with 10 CFR §440.22(b)(2). Since Hawaii does not have an approved priority list or field guide for large multi-family buildings, DLIR-OCS will work with Subgrantees to submit each building to DOE for review and approval prior to proceeding with weatherization work (per WPNs 16-5 and 19-4). For HUD assisted buildings, DLIR-OCS will follow the procedures in WPN 17-4 and complete the HUD property certification process, including submission of the:

1. Property Self Certification form that specifies that the building in question meets DOE's income eligibility requirements, and
2. Property Occupancy Report from current property records that confirm compliance with DOE's income eligibility requirements.

Per WPN 16-5, individual units with a multi-family building must meet specific criteria and be approved by DOE on a case-by-case basis prior to weatherization. Hawaii's policy is to weatherize the entire multi-family building whenever possible. For buildings that do not meet the 66% eligibility rule, DLIR-OCS will work with DOE to address individual units, where applicable.

References to the specific eligibility of multi-family buildings is addressed in 10 CFR §440.22(b)(2). DLIR-OCS defines "certain eligible types of large multi-family buildings" as privately owned multi-family buildings. In accordance with 10 CFR §440.22(b), subgrantees will ensure that a minimum of 50 percent of the dwelling units in duplexes, four-unit buildings, and "certain eligible types of large multi-family buildings" occupied by a family that meets the income requirements. Subgrantees must submit a Property Self-Certification form and a Property Occupancy Report to HUD and DOE, in accordance with Weatherization Program Notice 17-4. To weatherize "certain eligible types of large multi-family buildings," subgrantees must obtain the landlord and tenant's signatures on the Landlord Cooperation Agreement. Signed copies of this document will be provided to both the tenant and the property owner.

Describe the deferral Process

When there are major health, safety, or other circumstances that render the dwelling unit untenable, unsafe, or infeasible for weatherization installation, the subgrantee may decide whether to defer work in a dwelling unit or to not provide weatherization services. The issues that could result in deferral of services include but are not limited to:

- Major roof leakage;
- Major foundation damage;
- Major moisture problem, including mold infestation;
- Major plumbing problems;
- Human or animal waste in the home;
- Major electrical problems or fire hazards;
- The home is vacant, or the client is moving; and
- The home is for sale.

Behavioral issues may also be a reason to defer services to a client, including but not limited to:

- Illegal activity on the premises;
- Occupant's hoarding makes difficult or impossible to perform a complete audit; and
- Lack of cooperation by the client.

Should deferral be appropriate, the subgrantee provides a written Weatherization Deferral Notice to the clients. The client will be given 30 days to take corrective action. If the client is able to take corrective action within 30 days, then work will resume as soon as possible. If the problem is not corrected within 30 days, the subgrantee will change the status of the job to inactive. The client is able to reapply once the problem on the Deferral Notice has been corrected.

Deferral measures are referenced in the Hawaii Weatherization Field Guide, attached as Other_Master_Field Guide.

V.1.3 Definition of Children

Definition of children (below age): **19**

U.S. Department of Energy
WEATHERIZATION ASSISTANCE PROGRAM (WAP)
STATE PLAN/MASTER FILE WORKSHEET

(Grant Number: EE0007915, State: HI, Program Year: 2021)

V.1.4 Approach to Tribal Organizations

☐ Recommend tribal organization(s) be treated as local applicant?

If YES, Recommendation. If NO, Statement that assistance to low-income tribe members and other low-income persons is equal.

Currently, there is no federally recognized tribal organization in the State of Hawaii.

V.2 Selection of Areas to Be Served

Weatherization assistance is needed and provided statewide to all four counties: the City and County of Honolulu, Kauai County, Maui County, and Hawaii County. The PY2020 subgrantees will continue to provide services through PY2021. If at any time during the program year, a subgrantee is unable to meet WAP requirements, terminates its weatherization contract, or has excess funds, DLIR-OCS has the option of reallocating the funds among the remaining subgrantees.

V.3 Priorities

Priority for service delivery is given to elderly people, people with disabilities, families with children, high residential energy users, and households with high energy burden, in compliance with 10 CFR §440.16 and 10 CFR §440.22. Once a potential client has filled out the intake form, the subgrantee determines eligibility and ranks them on a point system, giving more points on the basis of priorities listed in 10 CFR §440.16.

V.4 Climatic Conditions

Due to Hawaii's tropical climate, Hawaii only experiences two seasons, winter and summer. Hawaii's summer is between the months of May and September and winter is October and April. During the summer, Hawaii experiences an increase in temperature, humidity, and sun intensity with a decrease in trade winds; and during the winter, Hawaii experiences heavy rain and lower temperatures. The following links summarize Hawaii's climate:

- Hawaii Average Precipitation (<http://www.wrcc.dri.edu/cgi-bin/anomimage.pl?haw12mPn.gif>)
- Precipitation Departure from Average (<http://www.wrcc.dri.edu/cgi-bin/anomimage.pl?haw12mPdep.gif>)
- Heating Degree Days in Hawaii (<http://www.wrcc.dri.edu/cgi-bin/anomimage.pl?haw12mHdd.gif>)
- Heating Degree Days Departure from Average (<http://www.wrcc.dri.edu/cgi-bin/anomimage.pl?haw12mHdddep.gif>)
- Cooling Degree Days in Hawaii (<http://www.wrcc.dri.edu/cgi-bin/anomimage.pl?haw12mCdd.gif>)
- Cooling Degree Days Departure from Average (<http://www.wrcc.dri.edu/cgi-bin/anomimage.pl?haw12mCdddep.gif>)
- Average Temperature (<http://www.wrcc.dri.edu/cgi-bin/anomimage.pl?haw12mTv.gif>)
- Average Max Temperature (<http://www.wrcc.dri.edu/cgi-bin/anomimage.pl?haw12mTx.gif>)

V.5 Type of Weatherization Work to Be Done

V.5.1 Technical Guides and Materials

The Hawaii Standard Work Specifications (SWS) Field Guide can provide subgrantees with guidance in addition to the 10 CFR §440 and 2 CFR §200. Before DLIR-OCS contracts the subgrantees, they are required to submit a quality assurance plan that provides, in detail, their procedures to ensure all Federal, State and County requirements are being met.

Currently, weatherization services include;

- Intake;
- Assessment and audit;

U.S. Department of Energy
WEATHERIZATION ASSISTANCE PROGRAM (WAP)
STATE PLAN/MASTER FILE WORKSHEET

(Grant Number: EE0007915, State: HI, Program Year: 2021)

- Energy saving measures;
- Energy education;
- Verification of work; and
- Monitoring energy usage and savings.

Installation measures are dependent on the energy audit that the subgrantee conducts for each household. Currently, there are eight approved weatherization measures in the Approved Hawaii Priority List that applies to single family homes and multi-family buildings with units of four or less (DOE approved on December 19, 2016). The following measures are listed in the order of highest to lowest in terms of cost effectiveness:

- Low-Flow Showerheads;
- Compact Fluorescent Light Bulbs (CFLs) or Light-Emitting Diodes (LEDs);
- Advanced Power Strips;
- Small Room Air Conditioners (6-15,000 Btu/h cooling capacity) Replacement*;
- Solar Water Heater or Hybrid Heat Pump Water Heater Installation;
- Refrigerator Replacement; and
- Large Room Air Conditioner (18,000 Btu/h cooling capacity) Replacement for Hawaii Island, Kauai, Lanai and Molokai only*.

* Air conditioner replacements may only be installed if the occupant is at-risk as defined by documented medical reasons for needing air conditioning. More information can be found in the Health and Safety Plan.

All subgrantee agreements and vendor contracts, active in PY 2017 and beyond, include language that clearly documents the SWS specifications for work quality outlined in WPN 15-4, section 2. A digital copy of the Hawaii Weatherization Field Guide (Field Guide) can be accessed online at <http://labor.hawaii.gov/ocs/service-programs-index/weatherization-assistance-program/>. By signing PY2021 WAP contracts with DLIR-OCS, subgrantees acknowledge they received the Field Guide and are held accountable to make sure all weatherization work meets or exceeds the standards set forth in the Field Guide. DLIR-OCS will ensure that subgrantees are providing their contractors with the required information on their expectation of work quality and program guidance by including the following language in their contract:

1. Subgrantee must certify it has informed contractors that work must meet the standards as outlined in the Hawaii Weatherization Field Guide and the Standard Work Specifications. This certification must be done annually and must be signed off by the subgrantee and an authorized employee of the contractor company.
2. All energy audits performed by the subgrantee or it's contractor will meet or exceed the requirements set forth in Weatherization Program Notice 16-8.

During on-site monitoring, DLIR-OCS will ensure that the language and required signatures for the Field Guide are in the subgrantee contractor files. Subgrantees will ensure that all contractors sign the final inspection form to indicate that the SWS Field Guide procedures and standards were implemented in the installation of the weatherization measures. (See Hawaii Priority List Attachment.)

U.S. Department of Energy
WEATHERIZATION ASSISTANCE PROGRAM (WAP)
STATE PLAN/MASTER FILE WORKSHEET

(Grant Number: EE0007915, State: HI, Program Year: 2021)

Approval Date:

Comments

A pre-installation evaluation, a post-installation evaluation, and an evaluation three and six months after the final inspection is conducted by the subgrantees. The data collected from these evaluations will be used to examine the client's energy cost at the given time to determine the efficiency and productivity of the weatherized measures installed in the dwelling.

DOE approved Hawaii's WAP energy audit procedures and priority list on December 19, 2016, and will be renewed this program year.

V.5.3 Final Inspection

In accordance with 10 §CFR 440.21, to complete installation of weatherization services for a dwelling, the subgrantee or its authorized representative conducts a final inspection of the dwelling unit to certify that all weatherization and mechanical work has been completed in a quality manner, is in compliance with applicable rules and codes, and is in accordance with the priorities determined by the audit.

Due to the type of weatherization done in the State of Hawaii and geographical location, Hawaii has an exemption for Certified Quality Control Inspectors (QCI). Therefore, the final inspector needs to be trained on the specific measures the State of Hawaii implements, but does not need to go through the QCI training.

The Hawaii SWS Field Guide aligns with WPN 15-4 section 3, which governs the quality control inspection process and outlines disciplinary actions for inadequate inspection practices. The inspector conducts a final inspection of all weatherized dwellings, which includes photos of the weatherized dwelling to show visual proof of installation and compliance to verify the following:

- Review all completed work with the client;
- Confirm that the client is satisfied;
- Specify corrective actions whenever the work does not meet standards; and
- Verify that all required paperwork, with required signatures, is in the client file.

V.6 Weatherization Analysis of Effectiveness

The effectiveness of the subgrantee's weatherization work is assessed using monthly program reports that reflect the targeted number of outcomes the number of homes that were weatherized, the measures that were implemented, and the status of applicants and potential applicants. In addition, the subgrantees submit a narrative to DLIR-OCS with a more detailed account of what the subgrantee did within the month.

Through the monthly report, the Program Specialist is able to see the variance between the targeted outcomes and the current outcomes per provider. This allows the Program Specialist to have a high level of awareness of the progression of each subgrantee towards meeting their contracted outcomes and effectiveness.

V.7 Health and Safety

(See Health and Safety Attachment.) Grantee does not have a separate Health and Safety budget category. The Subgrantees include this expense in their installation costs.

V.8 Program Management

V.8.1 Overview and Organization

U.S. Department of Energy
WEATHERIZATION ASSISTANCE PROGRAM (WAP)
STATE PLAN/MASTER FILE WORKSHEET

(Grant Number: EE0007915, State: HI, Program Year: 2021)

Administratively attached to DLIR, OCS was created by the State Legislature in 1985. This legislation is codified as Chapter 371K, Hawaii Revised Statutes.

DLIR-OCS collaborates with various public and private agencies to assist Hawaii's low-income, immigrant, and refugee populations to overcome and alleviate barriers to economic self-sufficiency through an array of community-based programs and services. The primary purpose of DLIR-OCS is "to facilitate and enhance the development, delivery, and coordination of effective programs for those in need and to provide advice and assistance to the agencies of the executive branch in the human service field, and the legislature."

The DLIR-OCS office is located in the Keelikolani building at 830 Punchbowl Street, Room 420, Honolulu, Hawaii 96813, telephone (808) 586-8675, fax (808) 586-8685.

V.8.2 Administrative Expenditure Limits

WAP Memorandum 075 and Section 1011(g) of the Energy Act of 2020 includes language that will amend 42 U.S. Code § 6865 (a)(1) language on administrative funds, such that the administrative cost category will now be increased from 10 percent to 15 percent. The State of Hawaii will allocate 15 percent of the total award with a direct split between itself and the subgrantees. Since the State of Hawaii will receive less than \$350,000 for PY 2021, subgrantees will be allocated an additional 5 percent for administrative costs.

V.8.3 Monitoring Activities

DLIR-OCS goals for monitoring WAP activities include:

1. Analyzing service delivery, program performance, and quality and effectiveness of the work on completed dwelling units.
2. Determining program compliance and accountability.
3. Identifying problems, deficiencies, and areas for program improvement.
4. Assisting subgrantees in their program operations and compliance with DOE and State regulations.
5. Advising subgrantees on how to correct any weaknesses and deficiencies.
6. Assessing the need for training and technical assistance to improve local agency service delivery, cost-effectiveness, and accountability.
7. Assessing how subgrantees, contractors, and anyone installing weatherization measures abide by the standards and technical requirements as stated in the updated Hawaii Weatherization Field Guide provided on the DLIR-OCS website: <http://labor.hawaii.gov/ocs/service-programs-index/weatherization-assistance-program/>.
8. Determining ways that monitoring activities can be improved.

In accordance with 10 CFR § 440.23 and to achieve the defined goals based on the principles stated above, DLIR-OCS monitors and evaluates the operations of projects carried out by subgrantees by performing periodic monitoring reviews of the fiscal, programmatic, and field functions of subgrantees through:

1. Desk monitoring: DLIR-OCS will review and track all available subgrantee reports for progress, expenditures, timeliness, audit findings, and resolution of findings.
2. Subgrantee Agency On-site Monitoring Visits: Each subgrantee receives at least one monitoring visit per year. Additional visits are scheduled as needed to address specific subgrantee issues as they arise. Included in these visits are:
 - Fiscal Monitoring:
 - Review of financial records;
 - Review of purchasing and bidding practices;
 - Review of payroll and documentation;
 - Review of travel records;
 - Review of vendor payments; and
 - Reviews last fiscal audit.
 - Program Monitoring
 - Client files;
 - Weatherization materials, tools, equipment, and inventory;
 - Client scheduling practices;
 - Safety policies and practices; and
 - Ten percent of all weatherized units.

U.S. Department of Energy
WEATHERIZATION ASSISTANCE PROGRAM (WAP)
STATE PLAN/MASTER FILE WORKSHEET

(Grant Number: EE0007915, State: HI, Program Year: 2021)

DLIR-OCS observes the following procedures for monitoring:

1. Monitoring visits will be scheduled in advance with the subgrantee. DLIR-OCS will work with each subgrantee agency to select monitoring dates. If traveling becomes a health and safety issue, instead of conducting an on-site monitoring visit DLIR-OCS will conduct desk monitoring and hold a teleconference call with the subgrantee. More information on remote monitoring visits can be found on the Remote Monitoring Procedures attached.
2. Prior to the agreed upon monitoring date, subgrantees will be given at least ten business days to prepare and submit requested fiscal and program documents for desk review. Desk reviews will include but are not limited to, examining application intake and pre-assessment procedures; energy audit and home inspection process; deferral cases incidents; prioritization of clients; and training and technical assistance activities.
3. Upon arrival at the subgrantee's office, or at the start of the teleconference call, DLIR-OCS will conduct an entrance interview with the appropriate agency personnel to explain the purpose of the visit, records and information needed, and the planned timeframe of the visit. The subgrantee's Weatherization Coordinator must be available at all times during the on-site monitoring visit, or teleconference call.
4. Inspection of weatherized dwelling units is to ensure the continuance of quality work and to address any problems. DLIR-OCS will conduct inspections on:
 - a. At least 10 percent of the units reported as completed will have an on-site monitoring inspection;
 - b. At least 10 percent of the units reported as completed will have files reviewed;
 - c. Spot checks will be made by the Program Specialist of the material on hand at the subgrantees' storage as well as materials already installed.
 - d. If traveling becomes a health and safety issue, instead of conducting on-site inspections, DLIR-OCS will ask subgrantees to provide certification that their WAP Coordinator or equivalent staff conducted verification visits for at least 10% of units reported as completed. More information on verification visits can be found on the Remote Monitoring Procedures attached.
5. DLIR-OCS will conduct an exit interview with the Weatherization Coordinator and all other staff of the subgrantee as DLIR-OCS considers appropriate based on the information received during the monitoring visit. The exit interview will include a review of the monitoring analysis.
6. Each monitoring inspection will be documented by a report prepared by DLIR-OCS' monitoring staff. DLIR-OCS will send a copy of the report to the Subgrantee 30 days after the conclusion of the monitoring visit or teleconference call. The monitoring report will identify any corrective action that needs to be taken, and it will also identify each unit visited or inspected by DLIR-OCS. If a monitoring report identifies matters for which DLIR-OCS believes that corrective action must be taken, the subgrantee shall respond fully within 30 days after receiving the report.
7. Action for removal of a subgrantee from the program: If DLIR-OCS determines after monitoring that a subgrantee is materially failing to provide services in accordance with its contract with DLIR-OCS, DLIR-OCS may initiate proceedings to terminate financial assistance to that subgrantee pursuant to 10 CFR 440.15(e) and 440.30.

Monitoring visits, in-person and remote, will help identify training and technical assistance needs for subgrantees and DLIR-OCS. As such, T&TA funds may be used to cover monitoring expenses.

V.8.4 Training and Technical Assistance Approach and Activities

The management of the weatherization program at the local level requires expertise in a wide array of areas including construction management, fiscal policy, client education, energy transfer theory, materials science, installation techniques, and related issues. In addition, weatherization agencies must operate their programs in accordance with a variety of governmental regulations and policies. Therefore, DLIR-OCS's approach to T&TA activities includes training at the grantee and subgrantee levels. T&TA needs are assessed through monitoring visits, email requests, detailed evaluation form regional training sessions, and monthly program reports.

Each subgrantee is allocated T&TA funds intended for WAP staff to attend comprehensive and specific trainings offered by Energy OutWest, NASCSP, Building Performance Association, and other DOE-approved accreditation organizations. As the State of Hawaii does not have any in-state accredited training programs, DLIR-OCS will coordinate trainings with accredited training programs to provide virtual trainings specifically for DLIR-OCS and subgrantees.

Some of the T&TA funds will also be used to pay annual NASCSP membership dues to continue partnering with NASCSP to provide trainings for subgrantees, and utilize as a resource for guidance on federal requirements. T&TA funds may also be used to conduct monitoring visits during PY 2021, depending on COVID-19 travel restrictions at that time. DLIR-OCS will coordinate and offer comprehensive training for subgrantees to continue improving WAP knowledge and best practices.

V.9 Energy Crisis and Disaster Plan

The State of Hawaii's Energy Crisis Plan can be found here (<http://files.hawaii.gov/dbedt/op/docs/Energy.pdf>). Hawaii has the Hawai'i Emergency Management Agency that coordinates services during disasters, issues disaster warnings, and educates the community about disaster preparedness (<http://scd.hawaii.gov/index.htm>).
