¹ The Census of Fatal Occupational Injuries (CFOI) has published data on fatal occupational injuries for the United States since 1992. During this time, the classification systems and definitions of many data elements have changed. Please see the CFOI Definitions page (<http://www.bls.gov/iif/oshcfdef.htm>) for a more detailed description of each data element and their definitions.

² May include volunteers and workers receiving other types of compensation.

³ Includes self-employed workers, owners of unincorporated businesses and farms, paid and unpaid family workers, and may include some owners of incorporated businesses or members of partnerships.

⁴ Persons identified as Hispanic or Latino may be of any race. The race categories shown exclude data for Hispanics and Latinos.

⁵ Industry data from 1992 to 2002 are classified according to the Standard Industrial Classification Manual, 1987.

⁶ Includes all fatal occupational injuries meeting this ownership criterion across all specified years, regardless of industry classification system.

⁷ Includes fatal injuries to workers employed by governmental organizations regardless of industry. Includes all fatal occupational injuries meeting this ownership criterion across all specified years, regardless of industry classification system.

⁸ Occupation data from 1992 to 2002 are based on the 1990 Occupational Classification System developed by the Bureau of the Census.

⁹ Includes fatal injuries to persons identified as resident armed forces regardless of individual occupation listed.

¹⁰ Based on the BLS Occupational Injury and Illness Classification System (OIICS) in effect for 1992 to 2010 data.

¹¹ May include some asphyxiations due to chest compressions.

¹² Based on the BLS Occupational Injury and Illness Classification System (OIICS) in effect for 1992 to 2010 data. The primary source of injury identifies the object, substance, or exposure that directly produced or inflicted the injury. For most transportation incidents, the primary source identifies the vehicle in which the deceased was an occupant. For most falls, the primary source identifies the surface or object contacted.

¹³ Includes, but is not limited to, walking, sitting, running, and climbing ladders or stairs.

¹⁴ The road construction location category was implemented in 1995. Includes road construction workers and vehicle occupants fatally injured in work zones. Work zones include construction, maintenance, and utility work on a road, street, or highway.

Note: Data for all years are revised and final. Totals for major categories may include subcategories not shown separately. Dashes indicate no data reported or data that do not meet publication criteria. N.e.c. means "not elsewhere classified." CFOI fatal injury counts exclude illness-related deaths unless precipitated by an injury event.
