2007 HAWAII REPORTED INJURIES AND ILLNESSES

In 2007, the total work force grew by 1.3 percent to 594,093 and the number of reported injuries and illnesses decreased by 4.9 percent to 26,105. Only 4 of 18 industries, wholesale trade, utilities, professional, scientific and technical services, and management of companies and enterprises had an increase in the number of reported cases. Wholesale trade had the smallest percentage increase at 2.4 percent or 23 injuries and illnesses to 980. Conversely, management of companies and enterprises had the largest percentage increase at 48.5 percent or 65 injuries and illnesses to 199 workers. Finance, insurance, real estate, rent and leasing had the smallest percentage decrease at 0.7 percent or 5 injuries and illnesses to 719. Natural resources and mining had the largest percentage decrease at 21 percent or 96 injuries and illnesses to 362. Accommodation and food services industry, which accounted for the largest number of injuries and illnesses, observed the greatest decrease in the number of reported cases of 255 to 4,317.

Utilities, professional, scientific and technical services, management of companies & enterprises, and administrative, support and waste management industries increased in their frequencies over-the-year to one injury or illness for every fifteen, sixty-nine, thirty-eight and twenty-two workers, respectively. Regardless of the increase, Professional, scientific and technical services appeared to have the safest work place with one injury and illness for every sixty-nine workers. Construction had the least safe work environment with one injury or illness for every thirteen workers. However, it was better than the previous two years with one injury or illness for every eleven workers. Wholesale trade and public administration remained unchanged with one injury or illness for every nineteen and twenty workers respectively in 2007.

TECHNICAL NOTES

The Workers' Compensation Data Book is based on the annual accumulation of data in the State of Hawaii, Disability Compensation database.

1. The following coding systems and locally revised versions were used to categorize data:
 - a) Industrial attachment is determined by the principal activity of the employer as defined in the **North American Industry Classification System 2002 (NAICS)**. The new NAICS industry groupings better reflect the workings of the U.S. economy, particularly in the services sector. NAICS, developed using a production oriented conceptual framework, groups establishments into industries based on the activity in which they are primarily engaged. It is not an update of the Standard Industrial Classification (SIC) system. NAICS focuses on how products and services are created. More information on NAICS is available at the U.S. Census Bureau website at <http://www.census.gov/epcd/www/naics.html>.
 - b) Codes and definitions used to categorize Nature of Injury or Illness, Part of Body Affected, Source of Injury or Illness, and Event or Exposure were modeled after the **1992 Bureau of Labor Statistics (BLS) Occupational Injury and Illness Classification Structures (OIICS)**. Starting with 1996 data, BLS OIICS data codes were locally modified to 2 digits instead of 4 digits, making the data less detailed.
 - c) Occupational groups are based on the **1990 Alphabetical Index of Industries and Occupations**, developed and published by the Bureau of the Census, Washington, D.C., U.S. Government Printing Office. Starting with 1996 data, the occupation classifications were locally modified, making the data less detailed.
2. From 1999, the employment data source used in the **Worker's Compensation Data Book** has been changed. Instead of the **Labor Force Data Book** employment we are using the **Employment and Payrolls in Hawaii** statistics. Employment data from the later publication may be more in line with workers covered under the Workers' Compensation program. Caution should be taken when reviewing the employment and frequency data for trend analysis prior to 1999.
3. From 2000, the table Hearings and Decisions Issued (previously called Compensation Orders Issued and Number of Hearings) has changed to include Act 59 settlements and attorney fees. The combined category Permanent Partial & Disfigurement no longer exists. Figures are reported under the category with the highest severity. For example: a case with disability payments and disfigurement award would be counted in the disability category and not in disfigurement.
4. Beginning with the **2002 Workers' Compensation Data Book**, there is a new format for the Industry category. The North American Industry Classification System (NAICS) is being used to designate the different industries instead of the Standard Industrial Classification (SIC) system. For trend analysis purposes, the data may not be comparable.
5. Effective with the **2004 Workers' Compensation Data Book**, the close date to process a "reported case" for the preceding calendar year was changed from January 31 to December 31 to accommodate the filing of electronic "WC-1 Employers Report of Industrial Injury". For trend analysis purposes, the data for 2004 may not be comparable.
