Status of the Fund

The Hawai'i Unemployment Compensation Trust Fund *balance, net of Federal Unemployment Account (FUA) loans, was -\$668.2 million at the end of November 2020*. As of November 2020 Hawaii has an outstanding loan balance of \$706.3 million. During the first eleven months of 2020, \$174.3 million in taxes and \$6.2 million in interest were added to the Fund. At the same time, \$1.4 billion in benefits were paid out from the Fund. As of November, the fund balance including the loan is 0.03 of the adequate level. This amount wouldn't finance almost eight years of unemployment at the worst level experienced during the last ten years.

Assuming the calendar year 2021 insured unemployment rate averages 6.0%, or about 32,800 claims per week, the fund balance is estimated to be -\$1.0 billion at the end of 2021. With this negative fund balance, Schedule H would be in effect for 2021.

Economic Factors

The national not seasonally adjusted total unemployment rate (TUR) was 6.4% as of November 2020, increasing from the November 2019 rate of 3.3%. Hawai'i's not seasonally adjusted total unemployment rate (TUR) was 10.1% in November 2020 as compared to 2.6% in November 2019. Hawai'i's total nonagricultural wage and salary job count grew in 2020, averaging 572,200 for the eleven months ending November 2020. This is a 82,300 decrease from the average of 654,500 for the same period in 2019.

The insured unemployment rate (IUR), a measure of the unemployed covered by Hawai'i's Unemployment Compensation program, is used to project outgo from the Unemployment Compensation Trust Fund. The IUR averaged 1.1% in 2019. It is at 14.69% as of November 2020.

Projections in this report assume continued high unemployment levels in Hawai'i through 2020. Trust fund estimates are based on an insured unemployment rate (IUR) of 11.75% in 2020 and 6.0% in 2021.

2021 Tax Schedule and Taxable Wage Base

Taxes will increase in calendar year 2021 due to high unemployment and negative fund balance at the end of 2020. Statutorily Tax Schedule H will be in effect for the calendar year for 2021 due to a fund balance of -\$668.2 million as of November 2020. Tax rates will range from 2.4% to 6.6%. The average tax rate is estimated to be 3.80%. The taxable wage base (maximum annual wages taxable per employee) will be \$47,400 in 2021.

BACKGROUND INFORMATION

Purpose of Report

This report is produced to meet the requirements of section 383–126.5, Hawai'i Revised Statutes, which calls for an *annual evaluation of the adequacy of the Hawai'i Unemployment Compensation Trust Fund balance*, taking into account conditions in the State and national economic trends.

Fund Definition and Requirements

Establishment of Fund in Hawai'i state law. The Hawai'i Employment Security Law (Hawai'i Revised Statutes, chapter 383) establishes the Unemployment Compensation Trust Fund under the administration of the Department of Labor and Industrial Relations. Unemployment insurance contributions (taxes) are collected from employers and deposited into this fund. Interest earned on the fund balance is also credited to the fund. The fund can be used *only* to pay unemployment insurance benefits or refunds of overpaid contributions.

Federal requirements. Both state and federal laws govern the unemployment insurance program. The Federal Unemployment Tax Act (FUTA), which is part of the U.S. Internal Revenue Code, provides for a federal payroll tax—currently 6.0% of the first \$7,000 in wages per year per employee. Employers receive a tax credit of 5.4% against the Federal tax (resulting in a net tax rate of 0.6%) if their state's law meets all the requirements in the federal laws. The federal tax pays for state and federal administration costs, the federal share of extended benefits, and a loan fund for states that deplete their unemployment funds.

The Social Security Act also contains many requirements relating to the unemployment insurance program.

Three important trust fund related federal requirements are as follows.

- All state Unemployment Compensation Trust funds must be maintained in the U.S. Treasury as part of the federal Unemployment Trust Fund. Each state has an account in the Trust Fund and interest is paid quarterly to the account by the federal government.
- The Trust Fund can be used essentially only for the payment of unemployment benefits.
- Employers receive the full 5.4% federal tax credit only if the state's system for determining individual employer tax rates meets federal standards. For example, the state's maximum tax rate must be at least 5.4% and an employer's tax rate may be reduced from the maximum, but the reduction must be based on that employer's experience with unemployment (experience rating).

Nonconformity to federal standards can result in:

- denial of all credit against the federal tax (employer's federal tax would be the full 6.0% on the \$7,000 wage base);
- denial of additional credit (employer's federal tax would be the difference of the full federal tax minus their state taxes paid); and/or
- denial of administration grants to run the state program.

To insure that Hawai'i employers continue to receive full federal unemployment tax credits, and funding for the state program is not lost, federal standards must be considered in developing laws affecting Hawai'i's Unemployment Compensation Trust Fund.

Self-financing of benefits by governmental and/or nonprofit employers. Sections 383-62 and 62.5, Hawai'i Revised Statutes provide that State and County governmental employers, nonprofit organizations described in section 501(c)(3) of the Internal Revenue Code and exempt from income tax under section 501(a) of such code, and Indian tribes may elect exemption from paying contributions by requesting self-financing status.

STATUS OF THE UNEMPLOYMENT COMPENSATION TRUST FUND

Status of the Fund

(Historical data from 1970: Appendix B, page A-5)

The fund balance was \$38.1 million at the end of November 2020 with the loan of \$706.3 million (-\$668.2 million without the loan) compared to \$600.5 million at the end of 2019. During the first eleven months of 2020, \$174.3 million in taxes and \$6.2 million in interest were added to the Fund. At the same time, \$1.4 billion in benefits were paid out from the Fund.

Projections through 2021: For this report, the insured unemployment rate is projected to average 11.8% in 2020 and 6.0% in 2021. This would result in a benefit outgo of about \$1.5 billion in 2020. Taxes and interest are projected at about \$183.7 million in 2020. On the basis of this forecasted level of unemployment, the fund balance would be about -\$705 million by the end of 2020 and statutorily Tax Schedule H would be in effect for 2021.

HAWAI'I UNEMPLOYMENT COMPENSATION TRUST FUND

(in millions of \$)

Fund Solvency

(Historical data from 1970: Appendix B, page A-6)

The Hawai'i Employment Security Law defines the factors used to measure the adequacy of the Fund and how the tax rate schedule for the coming year is determined based on that adequacy level. Appendix A outlines the method for determining the tax schedule and how each employer's individual tax rate is computed based on the employer's benefit and contribution experience as well as the schedule in effect.

During the 2007 Legislative Session, Act 110 temporarily redefined the *adequate reserve fund* as the amount of benefits that would be paid out during one year of unemployment at the highest level experienced during the

most recent ten years. The prior provisions of the law set the amount at one and one-half years at the highest cost rate. During the 2010 Legislative Session, Act 2 permanently redefined the adequate reserve fund amount to the one-year highest cost rate.

On page A-6, Appendix B, the table entitled *Ratio of Current to Adequate Reserve Fund* shows the data used in tax schedule computations since 1970. For the 2021 tax schedule computation, the adequate amount is \$1,500,712,292. The current reserve fund (actual fund assets as of November 30, 2020) is \$38,068,653. At this fund level, statutorily Schedule H will be in effect for 2021.

Tax Rates

(Historical data from 1970: Appendix B, page A-7)

One of eight tax schedules, A through H, is in effect for a calendar year as explained in Appendix A. Schedule A has the lowest tax rates, while schedule H has the highest. The average tax rate attainable from a particular tax schedule depends on the distribution of employers by reserve ratio groups. Employers tend to move to higher reserve ratio groups during periods when contributions exceed benefits. During such times, more employers move into the lower tax rate groups and the average tax rate for a schedule decreases. Conversely, during periods of high unemployment, more employers move to the higher tax rate groups and the average tax rate for each schedule automatically increases.

Under Act 2 (2010 Legislative Session), rather than apply the computed tax schedules, Schedule D was set for rate year 2010 and Schedule F was set for rate year 2011. Without Act 2, the tax schedule would have been F for 2010, and G for 2011. Act 6 (2012 Legislative Session) set the 2012 tax schedule at F; under the normal computations, it would have been Schedule H.

Minimum, maximum, and average tax rates are shown on page A-7; Appendix B. Taxes are estimated to average about 3.8% of taxable wages during calendar year 2021 with Schedule H in effect. From 1985 to 2012 the maximum tax rate on each tax schedule was 5.4%. Under Act 263 (2012 Legislative Session) the maximum tax rates on each schedule were increased as shown on Appendix A.

Taxable Wage Base

(Historical data from 1970: Appendix B, page A-8)

There is a maximum limit on the amount of taxable annual wages per employee for unemployment insurance tax purposes. The law sets this amount, the *taxable wage base*, at 100% of the statewide average annual wage.

Act 110 (2007 Legislative Session) set the taxable wage base at \$13,000 for 2008 through 2010. Act 110 also contained a provision to increase the wage base back to the regular formula if the fund fell below the adequate reserve fund level. Because the fund fell below adequate at the end of November 2009, the 2010 wage base computation should have returned to the 100% formula. However, Act 2 (2010 Legislative Session) reduced the taxable wage base to 90% of the average annual wage for calendar years 2010 and 2011. From 2012, the 100% formula is in effect. The taxable wage base for calendar year 2021 will be \$47,400, a \$700 decrease from the \$48,100 wage base in 2020.

Setting the wage base at the average annual wage results in approximately 69% of all wages being subject to unemployment insurance taxes. The \$13,000 taxable wage base lowered the percent of total wages taxed to about 36%. The 90% formula resulted in about 66% of wages taxed. The *Total and Taxable Wages* table on page A-8, Appendix B shows the taxable wage bases and the proportions of wages taxed since 1970.

The current tax schedule system was designed to work with the currently defined taxable wage base. When the wage base is lowered, the tax schedules will produce lower levels of income than they were designed to produce.

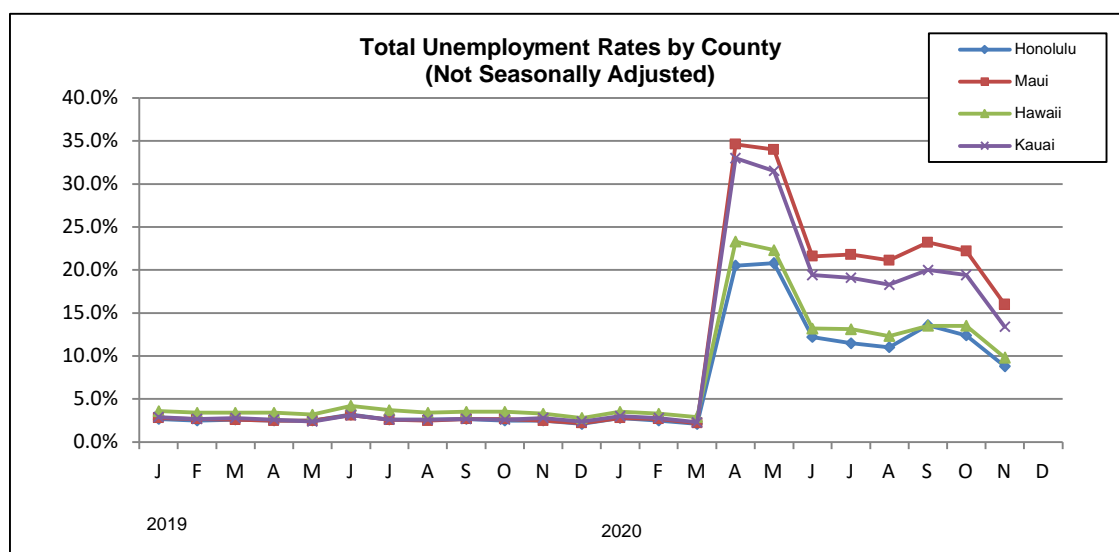

ECONOMIC FACTORS

General Conditions

Hawai'i and the National unemployment rate experienced large increases in unemployment as a result of recessionary economic conditions caused by the COVID-19 pandemic during 2020. The National not seasonally adjusted total unemployment rate (TUR) was 6.4% for November 2020, increasing from the November 2019 rate of 3.3%. Hawai'i's not seasonally adjusted TUR was 10.1% in November 2020 as compared to 2.6% in November 2019. As shown in the chart below, Hawai'i's unemployment rate decreased from 2.7% in February 2020 to 2.3% in March 2020, peaked at 23.6% in April, and then fell to 10.1% in November. For the month of November 2020, unemployment rates were 8.8% for Honolulu, 16.0% for Maui County, 9.8% for Hawai'i County, and 13.4% for Kaua'i County.

Hawai'i's total nonagricultural wage and salary job count averaged 572,200 for the eleven months ending November 2020. This is a 82,300 decrease from the 654,500 average for the same period in 2019. Comparing the month of November 2020 to November 2019, the total job count is down to 562,000 from 662,500—a 100,500 or 15% drop. During this eleven-month period, only local government is showing a small growth in 2020. All other sectors showed over the year declines in job counts. The major sectors with the largest decline in job counts were Leisure and Hospitality and Trade, Transportation & Utilities.

Outlook: This report assumes continued high unemployment levels for Hawai'i through 2021.

Civilian Labor Force Data

(Historical data from 1976: Appendix B, page A-2)

Total Civilian Labor Force in Hawai'i decreased from an annual average of 665,000 in calendar year 2019 to 644,600 in the first eleven months of 2020.

Total employed in Hawai'i decreased from an annual average 646,950 in calendar year 2019 to 567,000 during the first eleven months in 2020. Total unemployed increased from an average of 18,000 in 2019 to 77,000 for the January through November 2020 period.

Hawai'i's not seasonally adjusted total unemployment rate (TUR) averaged 12.2% over the first eleven months of 2020, increasing over the calendar year 2019 average of 2.7%.

The not seasonally adjusted total unemployment rate for the U.S. averaged 8.2% for the first eleven months of 2020, increasing over the calendar year 2019 average of 3.7%.

Projections for this publication assume the Hawai'i total unemployment rate will average 12.0% in 2020 and 10.9% in 2021.

CIVILIAN LABOR FORCE DATA

Not Seasonally Adjusted

Year	Civilian Labor Force

Notes: Except for percent unemployed, rounded to nearest 50.
 Totals may not add due to rounding.
 (B) Data from 2014-2018 reflect revised population controls and model reestimation.
 (P) Preliminary
 Total Unempl Rate: Percent of Labor Force

Insured Unemployment and Employment Covered by the Unemployment Compensation Trust Fund

(Historical data from 1970: Appendix B, page A-3)

The average monthly number of employees covered by the Fund was 482,634 in 2019, increasing from 484,587 in 2018. Covered employees decreased to an average of 475,396 for the 12-month period ending June 2020.

The insured unemployment rate (IUR) is average weekly unemployment insurance claims as a percent of covered employees. The IUR was 14.69% as of November 2020, compared to the 2019 average of 1.06%. The average weekly number of claims filed under the regular state program was 6,553 in 2019. The number of weekly claims averaged 74,561 as of November 2020.

Projections for the IUR: average of 11.15% for 2020 and 6.0% for 2021.

INSURED UNEMPLOYMENT RATE AND EMPLOYMENT COVERED BY THE UC FUND

Year	Insured Unemployment		Employees Covered By the Fund
	Rate (IUR)	Average Weekly Claims*	
2013	1.98%	11,221	451,156
2014	1.71%	9,740	458,518
2015	1.33%	7,607	467,820
2016	1.14%	7,012	475,512

<i>Projected</i>			
2020	11.15%	74,561	
2021	6.0%	32,825	

*Monthly data are for the week containing the 12th of the month and are based on 13-week moving averages. Figures do not include claims under special programs that extend benefits beyond 26 weeks of regular benefits.

Weekly Benefit Amounts and Average Duration

(Historical data from 1970: Appendix B, page A-4)

The *maximum weekly benefit amount* payable to claimants *will decrease to \$639 for the calendar year 2020* \$9 less than the \$648 maximum in 2020. Under Hawai'i's law a new maximum weekly benefit amount is normally computed each year as 70% of the current statewide average weekly wage. Prior to 1992, the computation used 2/3 rather than 70%. Effective for calendar years 2008 through 2010, the computation was made with a 75% multiplier due to Act 110 (2007 Legislative Session). Act 2 (2010 Legislative Session) extended the 75% multiplier through the 2011 computation. The computation returned to 70% for January through March 2012. Act 6 of the 2012 Legislative Session changed the computation back to 75% for claims filed from April through December 2012. From 2013 the formula returned to 70%.

Average weekly benefits received by claimants averaged \$443 for the 12-month period ending November 2020 as compared to an average of \$514 for calendar year 2019. A weekly benefit amount is computed for each claimant based on prior earnings. Average weekly benefits usually increase over time with increases in earnings. Average benefits increase more rapidly when workers with higher wages experience more unemployment and may decrease when lower wage claimants represent a larger proportion of the unemployed.

Claimants may receive up to the equivalent of 26 weeks of regular benefits at their computed weekly benefit amount. However, many return to work before collecting this entire amount. The *average number of weeks of regular benefits* received per claimant was 18.7 weeks for the twelve-month period ending November 2020. This is higher than the 2019 annual average of 15.3 weeks. These averages do not include benefits paid under special programs that extend benefits beyond the 26 weeks of regular benefits.

EXPERIENCE RATING

Description

Experience rating means that each employer's unemployment insurance tax rate is based on the employer's own benefit, contribution, and wage history. For each employer an account is kept of the amount of benefits paid to former employees and the amount of taxes paid into the Unemployment Compensation Trust Fund. At the end of the year, a *reserve ratio* is computed for each employer and that reserve ratio determines the employer's tax rate for the coming year. Appendix A describes this procedure.

Charged and Noncharged Benefits

(Historical data from 1970: Appendix B, page A-9)

For experience rating purposes benefits paid to former employees are usually charged to the employers' individual accounts. However, under certain conditions where the employer may be considered not responsible for the claimant's unemployment, the benefits paid to that former employee is *not* charged to the employer's account. The conditions for noncharging are described in Appendix C. In 2019, 12% of all benefits paid were not charged to an individual employer account. Noncharged benefits are financed by Unemployment Compensation Trust Fund interest income or by employers as a whole by triggering a higher tax schedule due to a lower fund balance.

2019 Employer Data

The following tables show 2019 employment, wage, benefit, and contribution data for employers who contribute to the Unemployment Compensation Trust Fund and for whom a tax rate was computed for calendar year 2020. Information on employers who were covered under the Hawai'i unemployment insurance program during 2019, but were no longer covered as of January 1, 2020, are not included in these tables. Data are shown by reserve ratio, county, size of firm, and industry groups. The reserve ratio tables show 2019 data by reserve ratios as of the end of 2019. Also shown on those tables are the 2020 tax rates assigned to each reserve ratio group.

Fifteen percent of all employers were in the highest reserve ratio group with ratios of 0.1500 and higher. These 5,055 employers were assigned the minimum 0.0% tax rate for 2020. Thirteen percent of the employers were assigned the maximum 5.6% tax rate, mostly due to delinquent filing of tax reports.

APPENDIX A Computation of Employer Contribution Rates

An employer's Hawai'i unemployment insurance tax rate is computed once a year based on the employer's reserve ratio and the tax schedule (one of eight possible schedules, A through H) in effect for the year. The tax rates corresponding to each tax schedule and reserve ratio group are shown below in the **Contribution Rate Schedules** table.

Employers not chargeable with benefits for the 12-month period prior to the rate computation date are ineligible for an experience (reserve ratio) computation and are assigned the tax rate corresponding to a zero reserve ratio; if the ineligible employer has a negative reserve balance, the maximum tax rate on the tax schedule in effect for the calendar year is assigned.

Computation of Employer Reserve Ratio:

Reserve Ratio = all contributions paid by the employer minus all benefits charged to the employer, divided by 1/3 of the sum of the employer's taxable payrolls for the last 3 consecutive calendar years.

Determination of Tax Schedule:

(a) Compute Adequate Reserve:

Adequate Reserve = *highest benefit cost rate occurring during the last 10 years, times total wages for last completed fiscal year ending June 30.

Benefit cost rate = total benefits paid during a 12 consecutive month period, divided by total wages for the last 4 completed calendar quarters ending at least 5 months before the end of the 12 consecutive month period.

(b) Compute ratio of Current Reserve to Adequate Reserve:

Ratio = Current Reserve (Unemployment Compensation Trust Fund balance as of November 30) divided by Adequate Reserve.

(b) Determine Tax Schedule based on ratio of current to adequate reserve as shown below.

*1.5 times multiplier was in effect for rate years 1970 to 1978 and 1992 to 2007.

Contribution Rate Schedules										Tax Schedule Computation	
Reserve Ratio	A	B	C	D	E	F	G	H	Ratio of Current to Adequate Reserve	Tax Schedule

Rate year: year during which rate schedule or Fund Solvency Rate is in effect.

High Cost Rate: highest benefit cost rate (benefits as a percent of total wages) in the last ten years.

Total Wages: for last four calendar quarters ending June 30 of calendar year prior to rate year.0

Adequate Reserve Fund: 1970 to 1978 and 1992 to 2007 adequate reserve equals 1.5 times high cost rate times total wages. 1979 to 1991 and from 2008, adequate reserve equals high cost rate times total wages.

Current Reserve Fund: UC Trust Fund assets on November 30 of calendar year immediately preceding rate year.

Rate Schedule in Effect: From July 1, 1974 through March 31, 1975 all employers' tax rates were increased by 0.5%, up to a maximum of 3.0%; from April 1975 through the end of 1976, all employers paid 3.0% tax rate; for 1977 and 1978 all employers paid 3.5% tax rate. *2002: schedule C remained in effect due to special legislation. **2010 and 2011: Act 2 (2010 Legislative Session) set tax schedules at D and F; 2012: Act 6 (2012 Legislative Session) set schedule at F.

Includes regular program benefits only; does not include extended benefits.

APPENDIX C

Benefits Not Charged to Employer Accounts

The following types of unemployment insurance benefits are not charged to individual employer's unemployment insurance accounts:

- a. Benefits paid to a claimant based on wages from an employer from whom the claimant voluntarily quit work without good cause¹;
- b. Benefits paid to a claimant based on wages from an employer from whom the claimant was discharged for misconduct connected with work;
- c. Benefits paid to a claimant based on wages from an employer from whom the claimant left work voluntarily for a good cause that was not attributable to the employer;
- d. Benefits paid to an individual who during that individual's base period earned wages for part-time employment with an employer, are not charged to that employer if the employer continues to employ the individual to the same extent while the individual is receiving benefits as during the individual's base period;
- e. Benefits paid to an individual for the period that individual is enrolled in and is in regular attendance at an approved training course;
- f. One-half of Extended Benefits (the other half of EB is financed with federal unemployment tax funds)²;
- g. Benefits paid to an individual who qualifies to receive benefits by meeting the minimum earnings and employment requirements only by combining the individual's employment and wages earned in two or more states³;
- h. Benefits overpaid to a claimant as a result of ineligibility or disqualification, unless the overpayment resulted from the employer's failure to furnish information as required;
- i. Benefits paid to an individual based on wages from an employer from whom the individual is separated as a direct result of a major disaster.⁴

¹ Benefits described in a, b, and c were chargeable from July 15, 1976 through October 4, 1986.

² EB was chargeable from January 1, 1985 through October 4, 1986.

³ Benefits described in g and h became nonchargeable from July 15, 1976.

⁴ Effective from September 13, 1992.

APPENDIX D

The Hawai'i Unemployment Compensation Trust Fund and Economic Conditions: 1970 to the Present

- 1970** The 1970s began with a low IUR (Insured Unemployment Rate) of slightly above 2% and high fund reserves in excess of \$40 million.
- 1971** Unemployment increased throughout 1971 in the aftermath of the Mainland recession, and due partly to a lengthy dock strike in the second half of the year. The Extended Benefits program was initiated allowing an additional 13 weeks of unemployment insurance benefits to be paid to claimants who exhaust their 26 weeks of regular benefits during periods of high unemployment. Hawai'i paid extended benefits from October 1971 through December 1972. Increasing unemployment and additional benefits paid out under the Extended Benefits program caused benefit outgo to increase and the fund balance to decline.
- 1972** The fund continued to decline as additional dock strikes and continuing Extended Benefits payments caused benefit outgo to remain high.
- 1973** Unemployment decreased slightly causing the fund balance to remain relatively level.
- 1974** The IUR began to climb again as Mainland recessionary conditions started affecting Hawai'i.
- 1975** Hawai'i began a new Extended Benefits period beginning in February 1975 as unemployment continued to increase. This EB period continued until March 1978 (except for a short break in the program during August 1977).
- 1976** The IUR reached a peak of 7% in the first half of 1976. During the 1974 through 1976 period, the fund balance was drastically reduced by the unprecedented high level of unemployment and corresponding high benefit outgos. The fund was depleted in 1976. Benefits continued to be paid during the year through the use of \$22.5 million in federal loans to the fund.
- 1977** The economy began to improve slightly, although construction strikes caused unemployment to temporarily increase at the end of 1977 and early 1978. In order to rejuvenate the fund, tax rates, which had been gradually increasing during the 1970s, were set at a uniform rate of 3.5% for 1977.
- 1978** The flat 3.5% tax rate continued to be in effect. As the economy improved, the IUR steadily declined until it leveled off at about 3% during the second half of the year. With the increased income and declining outgo, the fund balance was brought out of its negative levels and the federal loan was repaid late in 1978.
- 1979** Varied tax rates for employers (experience rating) was reinstated; this caused fund income to decline slightly from the high 1978 level. Benefits remained relatively low, resulting in a further increase in the fund balance to \$78 million by the end of 1979.
- 1980** Employer tax rates were again decreased based on the healthy fund reserves. Although Hawai'i's unemployment remained low, an Extended Benefits period was triggered on by high national unemployment. This EB period was from July 1980 to January 1981. Fund income exceeded outgo and reserves reached \$100.6 million by the end of 1980.
- 1981-1984** Unemployment was very stable with the IUR fluctuating only between 2.5% and 3.5%, weathering airline, construction, and other strikes occurring during this time. The fund balance was kept at about the adequate reserve level throughout the period
- 1985** Tax schedules were adjusted to include a maximum tax rate of 5.4% in order to allow employers to continue to receive full tax credits under the Federal Unemployment Tax Act (FUTA).
- 1986-1987** The tourism and construction industries were in a boom period resulting in declining unemployment and a growing fund balance.
- 1988** The high fund balance resulted in the triggering of a negative Fund Solvency Rate for the first time. Also, a one-year special law provision cut the Taxable Wage Base to 50% of the statewide average annual wage.
- 1989** Unemployment continued to decline with the IUR reaching an all time low of 0.96% in December 1989. The fund continued to be more than twice the adequate reserve level allowing the negative 0.5% Fund Solvency Rate to remain in effect.
- 1990** Despite Mainland recessionary conditions, Hawai'i tourism and construction continued to do well through 1990. Although a hotel strike during March caused a temporary rise in unemployment, the average IUR for the year remained level with 1989.

APPENDIX D continued

- 1991** The Persian Gulf War triggered a slowdown in March as tourist traffic declined dramatically and unemployment jumped. Mainland recessionary conditions began affecting Hawai'i's economy as unemployment remained high through the year especially in the construction and tourism related industries. A one-year special provision cut the taxable wage base to \$7,000.
- 1992** A new tax schedule system was implemented and the lowest tax schedule (A) was in effect for 1992. Hurricane Iniki hit the islands in September 1992 resulting in major damage and high unemployment on Kaua'i. Mainland and Japanese recessionary conditions continued to weaken the tourist and construction sectors. The end of year fund balance declined from the previous year for the first time since 1982. Emergency Unemployment Compensation (EUC) benefits were paid to claimants from November 1991 through April 1994. EUC benefits, paid to claimants who exhausted their regular state benefits, were 100% federally funded.
- 1993-1994** Tax schedule B was in effect for 1993 and 1994, keeping the average unemployment tax rate at a low 1%. At the same time, the tourism and construction sectors remained sluggish causing large benefit payouts from the fund.
- 1995-1998** The economy remained flat from 1995 through 1998, with benefit levels declining slightly each year. The fund balance stabilized at around \$210 million and tax schedule D stayed in effect from 1995 through 1998.
- 1999-2000** The economy was on the rise with insured unemployment dropping below 2% and the fund balance reaching \$300 million levels, triggering tax schedule C for 2001.
- 2001-2002** In the aftermath of terrorist attacks on the World Trade Center and the Pentagon on September 11, 2001, the number of unemployed increased and the fund balance began to drop. Special legislation provided Hawai'i claimants exhausting regular benefits between September 11, 2001 and June 30, 2002 with 13 weeks of additional benefits and kept tax schedule C in effect for calendar year 2002. A special federally funded program, Temporary Extended Unemployment Compensation (TEUC) also provided an additional 13 weeks of benefits to claimants, effective from March 10 to December 31, 2002.
- 2003-2004** The federal TEUC program was extended to December 31, 2003 with a transition period for the continuation of payments to individuals, who had balances as of the end of December, to March 31, 2004. Effective from April 20, 2003 through December 28, 2003, displaced airline and related workers who exhausted their 26 weeks of regular benefits received up to 39 weeks of additional federally funded TEUC-A benefits. Throughout 2004, Hawai'i's unemployment dropped significantly resulting in a growing trust fund.
- 2005-2006** Tourism, construction and real estate contributed to a very healthy economy where the insured unemployment rate dropped to 1.0% by the last quarter of 2005. The fund balance grew to more than \$500 million by November 2006 triggering a decrease in tax rates to Tax Schedule B for calendar year 2007.
- 2007** The 2007 Legislature enacted Act 110 which: increased the partial earnings disregard amount from \$50 to \$150; increased the maximum weekly benefit amount formula from 70% to 75% of statewide average annual wages for calendar years 2008 through 2010; set the taxable wage base at \$13,000 for calendar years 2008 through 2010; and changed the adequate reserve formula to remove the one and one-half times multiplier for the calendar years 2008 through 2010 tax schedule computations.
- 2008-2009** Airline closures in April 2008, the departure of major cruise ships, closures of pineapple and sugar operations, and finally major problems with the national financial sector resulted in a downturn in both the national and Hawai'i economies. The tourism and construction industries were especially hard hit. Recessionary conditions on the Mainland and in Hawai'i resulted in the IUR nearly doubling from an average 1.78% in 2008 to 3.36% in 2009, and the fund balance falling from \$552 million at the end of 2007 to \$134 million as of the end of 2009.
- A 100% federally financed Emergency Unemployment Compensation (EUC08) program was enacted to provide claimants who exhaust their regular 26 weeks of benefits with an additional 13 weeks of benefits effective from July 6, 2008. From November 23, 2008 an additional seven weeks were added, for a total of 20 weeks, of EUC08 benefits. Beginning with the week ending May 9, 2009, claimants who exhaust their first 20 weeks of EUC08 benefits (Tier 1) before December 31, 2009 could receive an additional 13 weeks of Tier 2 EUC08 benefits. Effective with the week ending November 14, 2009, claimants are eligible for one additional week of Tier 2, and 13 weeks of Tier 3 EUC08 benefits. This brought the total to 47 weeks of federally funded EUC08 benefits for Hawai'i claimants.

2010-2011

The EUC08 program was extended twice in 2010 and is scheduled to end January 3, 2012. Claimants who exhaust their regular or EUC08 tier benefits will not be able to begin a new tier after that date. Claimants may continue to receive benefits under their current tier until June 9, 2012.

Act 2 was enacted during the 2010 Legislative Session resulting in: extending the 75% formula for computing the maximum weekly benefit amount (MWBA) for 2010 and 2011; reducing the taxable wage base formula to 90% of the statewide average annual wage for 2010 and 2011; permanently reducing the adequate reserve fund definition by eliminating the 1.5 times multiplier; and setting the tax schedules at D for 2010 and F for 2011, rather than applying the computed tax schedules which would have been F and G respectively.

Economic conditions slowly improved throughout this period with the IUR declining from 3.4% in January 2010 to 2.4% in November 2011. However, benefit outgo continued to exceed contributions through the first half of 2011. The unemployment fund was depleted in December 2010 requiring Hawai'i to borrow federal Title IX loan funds to continue paying benefits. From December 2010 through August 2011, \$163 million in federal loans were received. All loans were repaid by August 2011.

2012 The EUC08 program was extended from June 2012 to end on January 2, 2013.

Effective January 2012 the MWBA formula returned to the 70% computation. However, it was only in effect from January through March as Act 6 (2012 Legislative Session) changed the formula back to 75% from April to the end of 2012. Act 6 also changed the 2012 tax schedule to F. The highest schedule, H, should have been in effect for 2012 as the fund balance had dropped to less than \$38 million at the end of November 2012.

The unemployment fund was depleted at the end of March 2012 requiring borrowing from the federal loan fund. Borrowing continued during the month of April 2012 with all loans repaid by the end of the month. Improving economic conditions during the second half of 2012 resulted in the fund balance increasing to over \$100 million by the end of November.

2013 The EUC08 program was extended from January 2, 2013 to January 1, 2014 by the American Tax Payer Relief Act of 2012. Last payable week was December 28, 2013.

Under Act 263 (2012 Legislative Session), the maximum tax rates on the tax schedules were increased from 5.4% on each schedule to increasing rates from 5.4% for Schedule A to 6.6% for Schedule H. See Appendix A for rates on each schedule.

Act 100, passed by the 2013 State Legislature and approved by the Governor on June 1, 2013, reclassified the Unemployment Compensation Fund as a trust fund as recommended by the state auditor.

2014-2015

The economic conditions continued to improve during this time frame, with the IUR decreasing from 1.88% in January 2014 to 1.13% in November 2015. The healthy labor market with the strong growth in tourism and expansion in construction contributed to the improved economy. The trust fund balance has grown to almost \$485 million at the end of November 2015, which triggered lowering the tax rates to Tax Schedule C for calendar year 2016.

2016 Act 070, passed by the 2016 State Legislature and approved by the Governor on June 17, 2016, provided an additional 13 weeks of unemployment benefits to the dislocated workers of a number of large employers in Maui County. Act 070 will be repealed on October 28, 2017.

2017-2018

There was little change in overall unemployment while funds continued to grow slowly and it remained on the third lowest Schedule C for 4 years since 2016.

2020 The coronavirus (COVID-19) pandemic created both a public health and economic crisis for the US and Hawaii. Unemployment spiked to its highest rate in April 2020 hitting 14.4% nationwide and 23.6% in Hawaii. While all sectors of the world's economy were affected by the coronavirus outbreak, the hotel, leisure, retail and travel industries have been hit hardest.

The surge in newly jobless people receiving unemployment benefits, depleted the trust funds in June requiring Hawaii to borrow federal Title IX loan funds to continue paying benefits. From July 2020 through the end of November 2020 \$706.3 million in federal loans were received. Hawaii will continue to borrow to pay regular UI benefits until the loan principal is paid off and contributions exceed benefits pay out.

Congress enacted the CARES Act, a temporary Pandemic Emergency Unemployment Compensation program (PEUC), providing up to 13 weeks of 100% federally funded benefits to individuals who have exhausted their regular unemployment compensation (UC) entitlement. Effective from December 26, 2020, an additional eleven weeks was added, for a total of 24 weeks of PEUC.

Furloughs and layoffs resulted in IUR exceeding 5.0% and the percentage of the prior two years exceeding 20%, triggering Hawaii to the Extended Benefits program for what appears to be the first time since 1981. Extended Benefits is the permanent "Triggered" extended benefits and would be payable when triggered, to claimants that have exhausted their 26 weeks entitlement to regular UI and provides at least 13 weeks of benefits. Benefits for the EB program are typically paid 50/50 by State/Federal trust funds, however the Families First Coronavirus Act made EB temporarily 100% federally funded until end of this year. By law, PEUC should be paid before EB and will be available for claimants exhausting both their regular and PEUC benefit entitlement.
